

iz7DJR ex i7zez, iv3zez

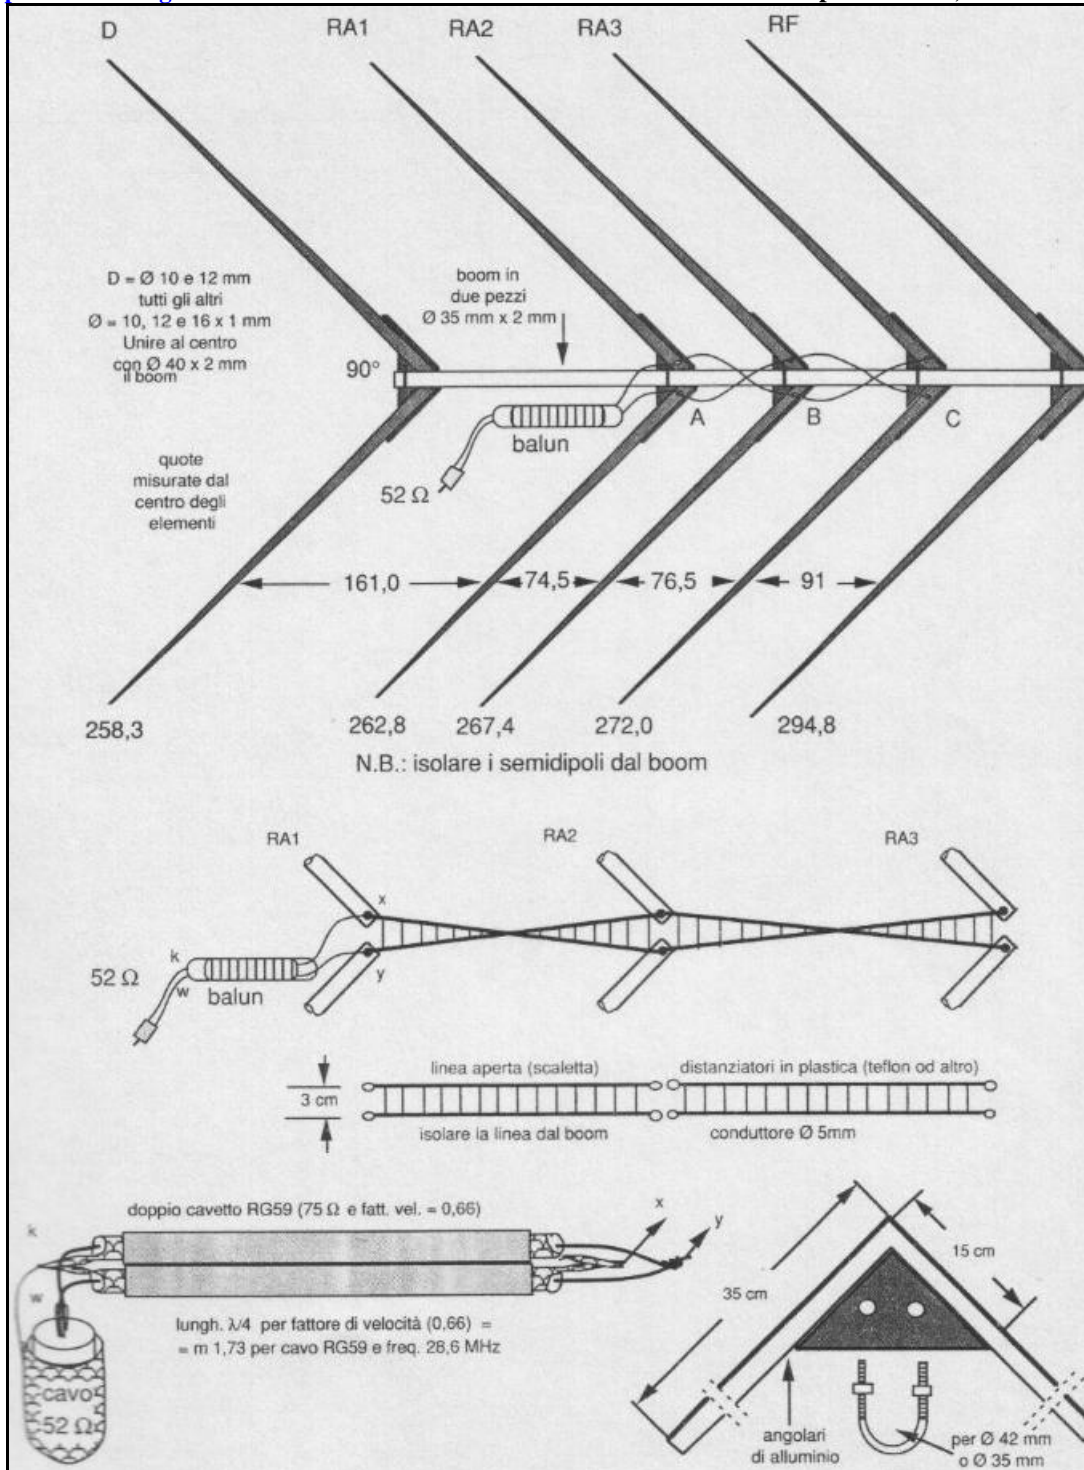

5V10

designed : july / 1989

5 elements "vee" log-yagi for 10m band- boom lenght : 4mt.
Gain : over 10 dBd , f/b =over 40 db (deep null) f/b= min 20db
for different polarization signals

eccellenti prestazioni in guadagno e fronte/retro su boom corto
minore di 4 m. - g = oltre 10dbd, f/b 40db (nullo) e non
inferiore a 20 db sia con polarizz.vert,che orizz.

balun:10 turns made by double RG59 coax on a core made by 3 ferrite rods

note:all quotes starting from element center
