SECTION	III.	Special tools list (Not applicable)		
	IV.	National stock number and part number index	444	

**SECTION I
INTRODUCTION**

1. Scope

This manual spares and repair parts; special tools; special test, measurement, and diagnostic equipment (CmDE), and other special support equipment required for performance of direct support and general support maintenance of the AN/FRR-79. It authorizes the requisitioning and issue of spare and repair parts indicated by the source and maintenance codes.

2. General

This Repair Parts and Special Tool List is divided into the following sections:

a. *Section II Repair Parts List.* A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in numeric sequence, with the parts in each group listed in figure and item number sequence.

b. *Section III Special Tools List.* Not applicable.

c. *Section IV National Stock Number and Part Number Index.* A list, in National item identification number (NN) sequence, of National stock numbers (NSN) appearing in the listings, followed by a list, in alphanumeric sequence, of part numbers appearing in the listings. National stock numbers and part numbers are cross referenced to each illustration figure and item number appearance.

3. Explanation of Columns

a. *Illustration.* This column is divided as follows:

(1) Figure number. Indicates the figure number of the illustration on which the item shown.

(2) Item number. The number used to identify item called out in the illustration.

b. *Source, Maintenance, and Recoverability (SMR) Codes.*

(1) *Source code.* Source codes indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

<i>Code</i>	<i>Definition</i>
-------------	-------------------

PA -	Item procured and stocked or anticipated or known
------	---

PD -	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial; issue or outfitting. Not subject to automatic replenishment.
------	---

XD -	A support item that is not stocked. When required, item will be procured through normal supply channels.
------	--

NOTE

Cannibalization or salvage may be used as a source of supply for any items Source coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the level of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

<i>Code</i>	<i>Application/Explanation</i>
-------------	--------------------------------

O -	Support item is removed, replaced, used at the organizational level.
-----	--

F -	Support item is removed, replaced, used at the direct support level.
-----	--

D -	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.
-----	--

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (authorized maintenance functions). This position will contain one of the following maintenance codes:

<i>Code</i>	<i>Application/Explanation</i>
-------------	--------------------------------

F -	The lowest maintenance level capable of complete repair of the support item is the direct support
-----	---

D -	The lowest maintenance level capable of complete repair of support item is the depot level.
-----	---

Z -	Nonreparable. No repair is authorized.
-----	--

(3) *Recoverability code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format follows:

<i>Recoverability codes</i>	<i>Definition</i>
-----------------------------	-------------------

Z -	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
-----	--

F -	Reparable item. When uneconomically repairable, condemn and dispose at the direct support level.
-----	--

D -	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
-----	---

L -	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
-----	--

c. *National Stock Number* Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d. *Part Number*. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

e. *Federal Support Code for Manufacturer (FSCM)*. The FSCM is a 5-digit numeric code stated in SB 708-42 which is used to identify the manufacture, distributor, or Government agency, etc.

f. *Description*. Indicates the Federal item name and, if required, a minimum description to identify the item.

g. *Unit of Measure (UIM)*. Indicates the standard of the basic quantity of the listed item used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. *Quantity Incorporated in Unit*. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunction -I group, or an assembly.

4. Special Information

The following publications pertain to the AN/FRR-79 and its components:

5. How to Locate Repair Parts

a. When National stock number or part number is unknown.

(1) *First*. Using the table of contents, determine the functional group within which the item belong. This is necessary since illustrations are prepared for functional groups and listings are divided into the same groups.

(2) *Second*. Find the illustration cover in the functional group to which the item belongs.

(3) *Third*. Identify the item on the illustration and note the illustration figure and item number of the item.

(4) *Fourth*. Using the Repair Parts Listing, find the figure and number noted on the illustration.

b. When National stock number or part number is known.

(1) *First*. Using the Index of National Stock Numbers and Part Number, find the pertinent National stock number or part number. This index is in NIUN sequence followed by a list of part numbers in alphameric sequence, cross-referenced to each illustration figure number and item number.

(2) *Second*. After finding the figure and item number, locate the figure and item number the repair parts list.
