

1. SCOPE

1.1 Scope. This drawing documents the general requirements of a high performance 15 MHz, rail to rail, dual operational amplifier microcircuit, with an operating temperature range of -55°C to +125°C.

1.2 Vendor Item Drawing Administrative Control Number. The manufacturer's PIN is the item of identification. The vendor item drawing establishes an administrative control number for identifying the item on the engineering documentation:

<u>V62/12639</u>	-	<u>01</u>	<u>X</u>	<u>E</u>
Drawing number		Device type (See 1.2.1)	Case outline (See 1.2.2)	Lead finish (See 1.2.3)

1.2.1 Device type(s).

<u>Device type</u>	<u>Generic</u>	<u>Circuit function</u>
01	OP262-EP	15 MHz. rail to rail, dual operational amplifier

1.2.2 Case outline(s). The case outlines are as specified herein.

<u>Outline letter</u>	<u>Number of pins</u>	<u>JEDEC PUB 95</u>	<u>Package style</u>
X	8	JEDEC MS-012-AA	Standard Small Outline Package

1.2.3 Lead finishes. The lead finishes are as specified below or other lead finishes as provided by the device manufacturer:

<u>Finish designator</u>	<u>Material</u>
A	Hot solder dip
B	Tin-lead plate
C	Gold plate
D	Palladium
E	Gold flash palladium
Z	Other

DLA LAND AND MARITIME COLUMBUS, OHIO	SIZE A	CODE IDENT NO. 16236	DWG NO. V62/12639
		REV	PAGE 2

1.3 Absolute maximum ratings. 1/

Supply voltage	±6 V
Input voltage	±6 V <u>2/</u>
Differential input voltage	±0.6 V <u>3/</u>
Internal power dissipation SOIC (S)	Observe derating curves
Output short circuit duration	Observe derating curves
Operating temperature range:	-55°C to +125°C
Storage temperature range	-65°C to +150°C
Junction temperature range	-65°C to +150°C
Lead temperature range (Soldering, 10 sec)	300°C

1.4 Thermal characteristics.

Thermal resistance

Case outline	θ_{JA} <u>4/</u>	θ_{JC}	Unit
Case X	157	56	°C/W

2. APPLICABLE DOCUMENTS

JEDEC – SOLID STATE TECHNOLOGY ASSOCIATION (JEDEC)

JEP95 – Registered and Standard Outlines for Semiconductor Devices

(Copies of these documents are available online at <http://www.jedec.org> or from JEDEC – Solid State Technology Association, 3103 North 10th Street, Suite 240–S, Arlington, VA 22201.)

3. REQUIREMENTS

3.1 Marking. Parts shall be permanently and legibly marked with the manufacturer’s part number as shown in 6.3 herein and as follows:

- A. Manufacturer’s name, CAGE code, or logo
- B. Pin 1 identifier
- C. ESDS identification (optional)

3.2 Unit container. The unit container shall be marked with the manufacturer’s part number and with items A and C (if applicable) above.

- 1/ Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute maximum rated conditions for extended periods may affect device reliability.
- 2/ For supply voltage greater than 6 V, the input voltage is limited to less than or equal to the supply voltage.
- 3/ For differential input voltages greater than 0.6 V, the input current should be limited to less than 5 mA to prevent degradation or destruction of the input device.
- 4/ θ_{JA} is specified for the worst case conditions, that is, θ_{JA} is specified for a device soldered in circuit board for SOIC package.

3.3 Electrical characteristics. The maximum and recommended operating conditions and electrical performance characteristics are as specified in 1.3 and table I herein.

3.4 Design, construction, and physical dimension. The design, construction, and physical dimensions are as specified herein.

3.5 Diagrams.

3.5.1 Case outline. The case outline shall be as shown in 1.2.2 and figure 1.

3.5.2 Terminal connections. The terminal connections shall be as shown in figure 2.

TABLE I. Electrical performance characteristics - Continued. 1/

Test	Symbol	Test conditions $V_S = \pm 5.0 \text{ V}$, $V_{CM} = 0 \text{ V}$ $T_A = 25^\circ\text{C}$ unless otherwise specified	Limits			Unit
			Min	Typ	Max	
Noise performance						
Voltage noise	e_n p-p	0.1 Hz to 10 Hz		0.5		$\mu\text{V p-p}$
Voltage noise density	e_n	$f = 1 \text{ kHz}$		9.5		$\text{nV}/\sqrt{\text{Hz}}$
Current noise density	i_n	$f = 1 \text{ kHz}$		0.4		$\text{pA}/\sqrt{\text{Hz}}$

- 1/ Testing and other quality control techniques are used to the extent deemed necessary to assure product performance over the specified temperature range. Product may not necessarily be tested across the full temperature range and all parameters may not necessarily be tested. In the absence of specific parametric testing, product performance is assured by characterization and/or design.
- 2/ Offset voltage drift is the average of the -55°C to $+25^\circ\text{C}$ delta and the $+25^\circ\text{C}$ to $+125^\circ\text{C}$ delta.
- 3/ Long term offset voltage is guaranteed by a 1000 hour life test performed on three independent lots at 125°C , with a LTPD of 1.3.

4. VERIFICATION

4.1 Product assurance requirements. The manufacturer is responsible for performing all inspection and test requirements as indicated in their internal documentation. Such procedures should include proper handling of electrostatic sensitive devices, classification, packaging, and labeling of moisture sensitive devices, as applicable.

5. PREPARATION FOR DELIVERY

5.1 Packaging. Preservation, packaging, labeling, and marking shall be in accordance with the manufacturer's standard commercial practices for electrostatic discharge sensitive devices.

6. NOTES

6.1 ESDS. Devices are electrostatic discharge sensitive and are classified as ESDS class 1 minimum.

6.2 Configuration control. The data contained herein is based on the salient characteristics of the device manufacturer's data book. The device manufacturer reserves the right to make changes without notice. This drawing will be modified as changes are provided.

6.3 Suggested source(s) of supply. Identification of the suggested source(s) of supply herein is not to be construed as a guarantee of present or continued availability as a source of supply for the item. DLA Land and Maritime maintains an online database of all current sources of supply at <http://www.landandmaritime.dla.mil/Programs/Smcr/>.
