

The 4CPW1000KA/9009 is a water-cooled power tetrode intended for use as a pulse modulator or in pulse regulator service. The tube is rated for 150 kVdc holdoff in a protective atmosphere, with a 90 amperes pulse cathode curent rating during conduction and a 1000 kilowatt anode dissipation rating (average during pulse). Peak anode current capability in excess of 150 ampers for short pulse operation is practical.
