

CMKBR-6F SMD Bridge Rectifier

features

- Monolithic Chip Construction
- Fast Switching
- Closely Matched Electrical Characteristics

description

The Central Semiconductor CMKBR-6F is the world's smallest silicon bridge rectifier, packaged in a SOT-363 surface mount case. The monolithic chip design provides superior V_F matching between each diode in the bridge. This device is ideal for today's smallest electronic devices, which require fast switching and closely matched V_F in a small package size.

Sample Devices
