[1] J-STD20 and JESD22

[2] All devices tested under avalanche conditions, for a time periode of 5ms, at 5mA.

[3] t_c is the time constant for the capacitive displacement current waveform (independent from T_j, I_{LOAD} and di/dt), different from t_{rr}, which is dependent on T_j, I_{LOAD}, di/dt. No reverse recovery time constant t_{rr} due to absence of minority carrier injection.

[4] Only capacitive charge occuring, guaranteed by design.
