

ORGANON Software Suite For Kontron Elektronik

- Integrated Tool Chain for all i386™, i486™ and Pentium® Processors
- Kontron Elektronik Tool Partner
- Embedded Development with Native Comfort
- Increased Productivity: Improved Quality
- RTOS Awareness
- C++ Programming & Real-Time Debugging
- 1st Choice Migration from i386™ Processor Development Tools
- Remote Debugging Via TCP/IP Network
- Runs on PC or Workstations
- One Call Support for Entire Tool Chain

The CAD-UL ORAGNON software debug environment works with the Kontron Elektronik in-circuit emulators. This comprehensive, modular, flexible, and user-friendly tool chain provides a complete set of development tools including compilers, linkers, assemblers, and high-level language debuggers. The package supports C, C++, and Pascal and is fully compatible with Kontron Elektronik in-circuit emulators.

CAD-UL is an industry leader with over fifty engineers developing innovative debugging solutions for Intel embedded systems applications. Contact Kontron Elektronik for more details.

Kontron Elektronik is a wholly owned subsidiary of BMW. All development tools have a one year limited warranty. Sales, applications support and service are available worldwide.

PROCESSORS SUPPORTED:
i386EX and C-Step, i386CX, i386DX, and i386SX processors; IntelDX4™, IntelDX2™, i486SX, i486SL Enhanced and Ultra Low Power processors; Pentium® processors

DEVELOPMENT PLATFORMS:
PC/Windows* 3.x, Windows 95, Windows NT, Sun, Unix, HP Workstation, RS6000
