

PC Card Drive For 16-Bit ISA Bus Computers

- SDDC (Solid-State Data Drive)
- Universal Dual Slot PC Card Drive
- Complete I/O and Memory PCMCIA Bus
- Accepts Type I, II and III PC Cards
- Includes Card and Socket Services
- Optional 32K x 8 Flash Boot ROM
- 5V Operation With Built-In VPP Generator

Adtron's PC Card Drive brings performance and universal PCMCIA compatibility to an embedded computer with a 16-bit ISA bus. Designed for the stringent requirements of the industrial user, this PC Card Drive supports all Type I, II and III SRAM, Intel Flash, ATA hard disk, modem, fax and network PC Cards. The dual socket PC Card Drive installs in a 16-bit ISA bus in one of three combinations: 1) two sockets on the ISA adapter card; 2) two sockets in a 3.5" drive bay cabled to the ISA adapter; 3) one socket on the ISA adapter and one cabled to a 3.5" drive bay. An optional on-board 32K x 8 Flash ROM allows extended BIOS or application specific code to be mapped into the computer's memory space.

Adtron support includes a technical applications staff for telephone support and custom designs, software updates through the Adtron bulletin board, and E-mail.

HOST SYSTEMS SUPPORTED:

16-bit ISA bus systems

PROCESSORS SUPPORTED:

Intel386™ CX/EX/SX/SXSA/DX,
Intel486™ SX, IntelDX2™, and IntelDX4™
Processors

AVAILABILITY:

Currently shipping with delivery stock
to 4 weeks.
