- TMax PF9600 Printer Controller Platform
- TMax 400NE Network Controller

The TMax Total Printing Environment provides the printer designer all of the necessary building blocks and products to quickly bring a printer to market. Topmax also provides PDL licensing, PDL porting service and complete turnkey designs. Topmax customers may choose which TMax product enables them to participate at their appropriate level of value-add.
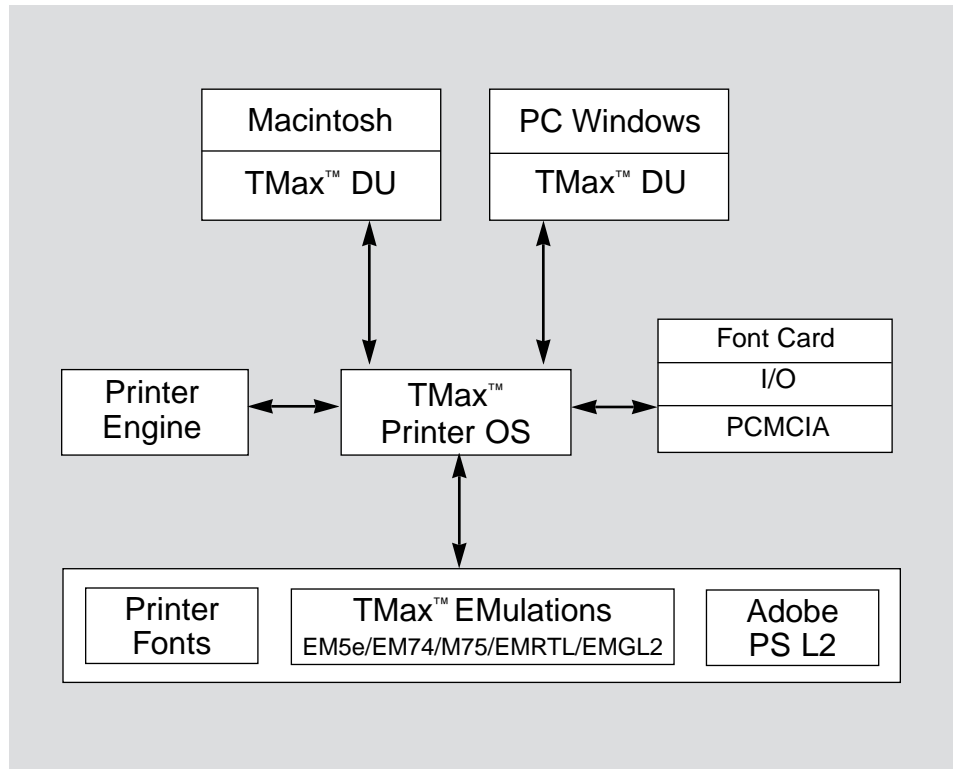

Topmax provides Macintosh and PC hosted Utilities and PC hosted Windows 3.1, Windows for Workgroups 3.11, and Windows 95 PCL 5e language drivers with Remote Control Panel.

Topmax supports GDI printing for Monochrome and Full Color Windows Printing.

The TMax OS Printer Operating System provides multitasking real-time support for all concurrent printing activities and multiple emulations.

Topmax provides Adobe Development Partner porting services for Adobe PostScript Level 2 as well as the licensing and porting of TMax EM5e emulation of PCL 5e, including complete PJL implementation. Topmax also provides large format 7475/7586 plotter emulations, RTL and HP-GL2 emulations.

The Topmax 400NE network controller directly interfaces with the PF9600 plat-

form and supports Novell NetWare, EtherTalk Phase 2, TCP/IP and SNMP; the most popular network protocols.
