

Fibre Channel Expertise

- Device Drivers: Win NT, AIX, HP/UX, UnixWare, Solaris, SCO, VxWorks, OS/2, and Others
- Embedded Systems Firmware
- i960® Processor Firmware and Hardware Design Expertise
- Management Software
- Real-Time Systems
- Hardware Development
- Design Consulting
- Fibre Channel Expertise
- Training

Infinity CommStor provides software and hardware development and consulting expertise in the field of high-speed communications and storage channel standards: Fibre Channel, ATM, FDDI, TCP/IP, and SCSI. Infinity CommStor has assembled a team of dedicated professionals with extensive experience in all facets of high-speed communication and storage standards. Infinity CommStor's mission is to be recognized as a premier provider of communications and storage software and hardware consulting, training, and development expertise.

Our team has over 10 man-years of experience developing the highest quality solutions, utilizing the i960 family of processors, in high-speed communication and storage channel attachments. Infinity CommStor provides the spectrum of consulting services including architectural specification, requirements analysis, system and sub-system design, implementation, testing and support. All software solutions are implemented in ANSI compliant "C".

PROCESSORS SUPPORTED:

i960 Sx, Jx, Kx, Cx, Hx Processors
