ISL6252AEVAL1Z Evaluation Board Setup Procedure

Application Note | October 25, 2007 | AN1361.0

Low Cost Multi-Chemistry Battery Charger Controller

The ISL6252, ISL6252A is a highly integrated battery charger controller for Li-ion/Li-ion polymer batteries and NiMH batteries. High Efficiency is achieved by a synchronous buck topology and the use of a MOSFET, instead of a diode, for selecting power from the adapter or battery. The low side MOSFET emulates a diode at light loads to improve the light load efficiency and prevent system bus boosting.

The constant output voltage can be selected for 2-, 3- and 4-series Li-ion cells with 0.5% accuracy over-temperature. It can be also programmed between 4.2V +5%/cell and 4.2V -5%/cell to optimize battery capacity. When supplying the load and battery charger simultaneously, the input current limit for the AC adapter is programmable to within 3% accuracy to avoid overloading the AC adapter, and to allow the system to make efficient use of available adapter power for charging. It also has a wide range of programmable charging current. The ISL6252, ISL6252A provides outputs that are used to monitor the current drawn from the AC adapter, and monitor for the presence of an AC adapter. The ISL6252, ISL6252A automatically transitions from regulating current mode to regulating voltage mode.

Ordering Information

PART NUMBER (Note)	PART MARKING	TEMP RANGE (°C)	PACKAGE (Pb-Free)	PKG. DWG. #
ISL6252HRZ*	ISL 6252HRZ	-10 to +100	28 Ld 5x5 QFN	L28.5×5
ISL6252AHRZ*	ISL6252 AHRZ	-10 to +100	28 Ld 5x5 QFN	L28.5×5

*Add “-T” suffix for tape and reel. Please refer to TB347 for details on reel specifications.

NOTE: These Intersil Pb-free plastic packaged products employ special Pb-free material sets; molding compounds/die attach materials and 100% matte tin plate PLUS ANNEAL - e3 termination finish, which is RoHS compliant and compatible with both SnPb and Pb-free soldering operations. Intersil Pb-free products are MSL classified at Pb-free peak reflow temperatures that meet or exceed the Pb-free requirements of IPC/JEDEC J STD-020.

Features

- ±0.5% Charge Voltage Accuracy (-10°C to +100°C)
- ±3% Accurate Input Current Limit
- ±3% Accurate Battery Charge Current Limit
- ±25% Accurate Battery Trickle Charge Current Limit (ISL6252A)
- Programmable Charge Current Limit, Adapter Current Limit and Charge Voltage
- Fixed 300kHz PWM Synchronous Buck Controller with Diode Emulation at Light Load
- Output for Current Drawn from AC Adapter
- AC Adapter Present Indicator
- Fast Input Current Limit Response
- Input Voltage Range 7V to 25V
- Support 2-, 3- and 4-Cell Battery Pack
- Up to 17.64V Battery-Voltage Set Point
- Thermal Shutdown
- Support Pulse Charging
- Less than 10µA Battery Leakage Current
- Charge Any Battery Chemistry: Li-Ion, NiCd, NiMH, etc.
- Pb-Free (RoHS Compliant)

Applications

- Notebook, Desknote and Sub-notebook Computers
- Personal Digital Assistant)

What's Inside

This Evaluation Board Kit contains the following materials:

- Qty(1) ISL625xEVAL1Z Evaluation Board
- Qty(1) ISL6252EVAL1Z Setup Procedure

What is Needed

The following materials are recommended to perform testing:

- One adjustable 25V 6A power supply
- Two adjustable electronic loads with constant current mode and constant voltage mode
- Two DVMs
- One 500MHz four channel oscilloscope
- Four passive oscilloscope voltage probes
- Two 10ADC Current Probes
- One signal generator

Jumper Selection Guide

Step 1: Select the Number of Cells (Table 1)

The CELLS pin chooses the correct output voltage clamp for a given number of cells series-connected in the battery pack. Select the output voltage by placing a shunt jumper across the appropriate pins of JP1.

TABLE 1. JUMPER JP1 FUNCTIONS

SHUNT JUMPER LOCATION	CELLS PIN CONNECTED TO:	NUMBER OF CELLS CONNECTED IN SERIES	100% CONSTANT OUTPUT VOLTAGE
1-2	VDD	4	16.8
2-3	GND	3	12.6
Removed	Floating	2	8.4

Step 2: Select the Cell Trim Voltage (Table 2)

The VADJ pin trims the battery charger output voltage limit. Preset battery charger output voltage limits are selected by placing a shunt jumper across the appropriate pins of JP6. For other battery charger output voltage limits install a shunt jumper across pins 3 and 4 which connects the wiper of potentiometer R24 to VADJ. Potentiometer R24 may be removed and replaced with resistors R_{19} and R_{21}. Resistor R_{20} limits the trim increase to 1%. Shorting R_{20} allows the trim to increase 5%. Decreasing trim range is unaffected.

TABLE 2. JUMPER JP6 FUNCTIONS

SHUNT JUMPER LOCATION	VADJ PIN	BATTERY VOLTAGE CHANGE PER CELL
1-3	To VREF	+5%
3-5	To GND	-5%
5-6	Floating	None
3-4	R24 Wiper or R_{19}/R_{21}	Adjustable between -5% to +5%

Step 3: Select the Battery Charger Current Limit (Table 3)

The CHLIM pin chooses the desired battery charger current limit threshold. Preset battery charger current limit thresholds are selected by placing a shunt jumper across the appropriate pins of JP4. For other battery charger current limit thresholds, install a shunt jumper across pins 3 and 4, which connects the wiper of potentiometer R22 to CHLIM. Potentiometer R22 may be removed and replaced with resistors R_6 and R_7.

TABLE 3. JUMPER JP4 FUNCTIONS

SHUNT JUMPER LOCATION	CHLIM PIN CONNECTED TO:	100% CURRENT FEEDBACK CSOP TO CSON	100% CONSTANT CURRENT
1-3	VREF	120mV	4.80A
Removed	Floating	0V	0A
3-5	GND	0V	0A
3-4	R22 or R_6/R_7	0mV to 120mV	0A to 4.8A

Step 4: Select the AC Adapter Current Limit (Table 4)

The ACLIM pin chooses the desired AC adapter current limit threshold. Preset AC adapter current limit thresholds are selected by placing a shunt jumper across the appropriate pins of JP5. For other AC adapter current limit thresholds install a shunt jumper across pins 3 and 4 which connects the wiper of potentiometer R23 to ACLIM. Potentiometer R23 may be removed and replaced with resistors R_{17} and R_{18}.

TABLE 4. JUMPER JP5 FUNCTIONS

SHUNT JUMPER LOCATION	ACLIM PIN CONNECTED TO:	100% CURRENT FEEDBACK CSIP TO CSIN	100% ADAPTER CURRENT
1-3	VREF	100mV	5.15A
Removed	Floating	75mV	3.90A
3-5	GND	50mV	2.65A
3-4	R23 or R_{17}/R_{18}	50mV to 100mV	2.65A to 5.15A
