NL / Let vooral op de juiste inbouw van de LED's. De "K"-aansluiting is iets afgevlakt (zie tekening). Met de instelpotentiometer kan de knippersnelheid ingesteld worden.

P / Tenha o cuidado de montar os leds correctamente. O terminal "K" tem um lado ligeiramente achatado (ver a figura). Com a ajuda do potenciometros ajustável é possível ajustar a velocidade do efeito.

SF / Ota huomioon LED:in oikea asennus. "K"-napa on vähän litistetty (katso kuva). Trimmeripotentiometrillä voi säätää vilkkumistaajuuden.

F / Veiller au montage correct des leds. Le branchement "K" (cathode) est légèrement aplati (voir schéma). Le potentiomètre permet de régler la fréquence d'allumage.

GB / Please take special care mounting the LED's correctly. The "K"-connection has been slightly flattened (see figure). With the aid of the trimmer potentiometer it is possible to adjust the flashing velocity.

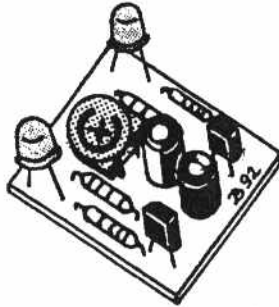

LED's a piscar alternadamente

Circuito para colocar 2 leds a piscar alternadamente. Velocidade ajustável. Tensão de alimentação: 6 a 12V (pode ser usada uma bateria de 9V). Utilização: efeitos luminosos, placas com nome, construções miniatura...
