

# Step Recovery Diodes

## MA43000, MA44600, MA44700 Series

V3.00

### Features

- Low Transition Times
- Tight Capacitance Ranges
- High Voltage and Low Thermal Resistance for Higher Input Power
- Surface Mount Package Available (SOT-23)

### Description

The MA44600 series of Step Recovery diodes is designed for use in low and moderate power multipliers with output frequencies of up to 20 GHz. These Step Recovery diodes generate harmonics by storing a charge as the diode is driven to forward conductance by the positive voltage of the input signal. When the signal reverses polarity, this charge is extracted. The Step Recovery diode will appear as a low impedance current source until all the charge is extracted, then it will “snap” to a higher impedance. This causes a voltage pulse to form in the impulse circuit of the multiplier. Step Recovery diodes make excellent high order multipliers such as comb generators. They are also useful as efficient moderate power X2- X4 multipliers.

### Applications

High Order Narrow Band Moderate Power Multipliers (MA44600 series)

Comb Generators (MA43592, MA43543)

High Power Circuit Tested Multiplier (MA43000 Series)

Surface Mount Low Power Multipliers (MA44700 Series)

Specifications Subject to Change Without Notice.

MA44663D	60	1.5 / 2.0	20	250	300

**Notes:**

- When ordering, specify the desired case style by adding the case designation as a suffix to the model number. Case styles for the MA44600 series are 30, 91 and 93. To order in chip form, add the suffix "134" to the model number. The nominal chip size for the MA44600 series is 15 mils.
- Reverse voltage ( $V_R$ ) is measured at a reverse bias current of 10  $\mu$ A.
- Junction capacitance is measured at a reverse voltage of 6 volts and a frequency of 1 MHz.
- Transition time is measured between 20% and 80% points on the voltage recovery trace. Test conditions are +10 mA and -10 volts.

### Case Styles (See appendix for complete dimensions)

## Absolute Maximum Ratings @ 25°C

Parameter	Absolute Maximum
Temperature Range	
Operating Range	-65°C to +200°C -65°C to +125°C (SOT-23 only)
Storage Range	-65°C to +200°C -65°C to +125°C (SOT-23 only)

## Environmental Performance

The MA44600 and MA43000 series of diodes in ceramic packages are capable of meeting the tests dictated by the methods and procedures of the latest revisions of MIL-S-19500, MIL-STD-202 and MIL-STD-750 which specify mechanical, electrical, thermal and other environmental tests common to military semiconductor products.
