

Features

- Full Integration: VCO, PLL, Loop Filter
- Wide Bandwidth (> 2GHz)
- Fast Switching ($\leq 50\mu\text{s}$)
- Low noise: Typ -110 dBc/Hz @ 100kHz offset

Description

This synthesiser is designed for demanding wide bandwidth applications.

The fully integrated design incorporates a VCO, PLL and loop filter in a convenient surface mount package. The lid is fully solder attached to provide optimum electrical shielding.

Programming is via 3 Wire SPI (Serial Peripheral Interface.)
