# Surface Mount **Monolithic Amplifier**

## DC-2 GHz

#### **Product Features**

- Wideband, DC to 2 GHz
- Cascadable ceramic package
- Internally Matched to 50 Ohms
- Low noise figure, 1.9 dB typ.
- Excellent repeatability
- Aqueous washable

## **Typical Applications**

- Cellular
- UHF/VHF
- Communication system
- Transmition receivers

## RAM-6A+ CASE STYLE: AF190

+RoHS Compliant The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

### **General Description**

RAM-6A+ (RoHS compliant) is a wideband amplifier offering high dynamic range. It has repeatable performance from lot to lot. It is enclosed in a ceramic surface-mount package. RAM-6A+ uses Darlington configuration and is fabricated using GaAs technology.

## simplified schematic and pin description

| Function         | Pin Number | Description  |  |
|------------------|------------|--|--|
| RF IN            | 1          | RF input pin. This pin requires the use of an external DC blocking capacitor chosen for the frequency of operation.  |  |
| RF-OUT and DC-IN | 3          | RF output and bias pin. DC voltage is present on this pin; therefore a DC blocking capacitor is necessary for proper operation. An RF choke is needed to feed DC bias without loss of RF signal due to the bias connection, as shown in "Recommended Application Circuit". |  |
| GND              | 2,4        | Connections to ground. Use via holes as shown in "Suggested Layout for PCB Design" to reduce ground path inductance for best performance.  |  |

a. The RAM-6A+part number is a potential replacement for the MSA-0636 part number based on a comparison of data and characterization information available for the MSA-0636 versus similar data and the measured performance of RAM-6A+; the final determination of whether this RAM-6A+ part number is suitable for model replacement within a particular system must be determined by and is solely the responsibility of the customer based on, among other things, electrical performance criteria, stimulus conditions, application, compatibility with other components, and environmental conditions and stresses

b. The MSA-0636 part number is used for identification and comparison purposes only

c. Avago Technologies is a registered trademark of Avago Technologies and is in no way affiliated with Mini-Circuits.

d. Data in Table for the MSA-0636 was taken from Avago Technologies published datasheet April 12, 2007and is used solely for informational purposes to identify MSA-0636

#### Notes

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions. C. The parts covered by this specification document are subject to Mini-Circuit's standard limited warranty and terms and conditions (collectived), "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. ## Electrical Specifications at 25°C and 16mA, unless noted

| Parameter   |               | Min.              | Тур.  | Max. | Units |
|---|---------------|-------------------|-------|------|-------|
| Frequency Range*                                  |               | DC                |       | 2    | GHz   |
| Gain  | f=0.1 GHz     |                   | 21.3  |      | dB    |
|   | f=1 GHz       | _                 | 19.7  |      |       |
|   | f=2 GHz       | 15.4 <sup>2</sup> | 17.1  |      |       |
| Input Return Loss <sup>3</sup>                    | f=DC to 2 GHz |                   | 20    |      | dB    |
|   |               |                   |       |      |       |
| Output Return Loss <sup>3</sup>                   | f=DC to 2 GHz |                   | 20    |      | dB    |
| Output Power @ 1 dB compression                   | f=0.5 GHz     |                   | +3.2  |      | dBm   |
| Output IP3  | f=0.5 GHz     |                   | +17.3 |      | dBm   |
| Noise Figure                                      | f=0.5 GHz     |                   | 2.3   |      | dB    |
| Recommended Device Operating Current              |               |                   | 16    |      | mA    |
| Device Operating Voltage                          |               |                   | 3.5   |      | V     |
| Device Voltage Variation vs. Temperature at 16 mA |               |                   | -2.8  |      | mV/°C |
| Device Voltage Variation vs. Current at 25°C      |               |                   | 4.4   |      | mV/mA |
| Thermal Resistance, junction-to-case <sup>1</sup> |               |                   | 100   |      | °C/W  |

\*Guaranteed specification DC-2 GHz. Low frequency cut off determined by external coupling capacitors.

### **Absolute Maximum Ratings**

| Parameter             | Ratings        |  |  |
|-----------------------|----------------|--|--|
| Operating Temperature | -54°C to 100°C |  |  |
| Storage Temperature   | -65°C to 150°C |  |  |
| Operating Current     | 50mA           |  |  |
| Power Dissipation     | 200mW          |  |  |
| Input Power           | 13dBm          |  |  |

Note: Permanent damage may occur if any of these limits are exceeded.

These ratings are not intended for continuous normal operation.

- <sup>1</sup>Case is defined as ground leads.
- <sup>2</sup>Full temperature range.

<sup>3</sup>RAM-6A+ conditionally stable, source and load VSWR<5:1 required.

Potentially unstable with very high VSWR terminations.

Notes

A Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document. B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions. C. The parts covered by this specification document are subject to Mini-Circuit's standard limited warranty and terms and conditions (collective), "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuit's website at www.minicircuits.com/MCLStore/terms.jsp

## **Product Marking**

Markings in addition to model number designation may appear for internal quality control purposes.

#### Additional Detailed Technical Information

Additional information is available on our web site. To access this information enter the model number on our web site home page.

#### Performance data, graphs, s-parameter data set (.zip file)

#### Case Style: AF190

Ceramic surface-mount, .083 body diameter, lead finish: tin-silver over nickel

#### Tape & Reel: F14

7" inch reels with 20, 50, 100, 200, 500, 1000 devices.

#### Suggested Layout for PCB Design: PL-254

Evaluation Board: TB-414-6A+

#### **Environmental Ratings: ENV08T6**

### **Recommended Application Circuit**

Test Board includes case, connectors, and components (in bold) soldered to PCB

| R BIAS |  |  |  |  |  |
|--------|--|--|--|--|--|
| Vcc    | "1%" Res. Values (ohms)<br>for Optimum Biasing |  |  |  |  |
| 6      | 154  |  |  |  |  |
| 7      | 215  |  |  |  |  |
| 8      | 280  |  |  |  |  |
| 9      | 340  |  |  |  |  |
| 10     | 402  |  |  |  |  |
| 11     | 464  |  |  |  |  |
| 12     | 536  |  |  |  |  |
| 13     | 590  |  |  |  |  |
| 14     | 665  |  |  |  |  |

## **ESD** Rating

Human Body Model (HBM): Class 1C (1000 to <2000V) in accordance with ANSI/ESD STM 5.1 - 2001 Machine Model (MM): Class M2 (100V to <200V) in accordance with ANSI/ESD STM 5.2 - 1999
