

Features

- Four, six and eight channels of EMI filtering with integrated ESD protection
- Pi-style EMI filters in a capacitor-resistor-capacitor (C-R-C) network
- $\pm 15\text{kV}$ ESD protection on each channel (IEC 61000-4-2 Level 4, contact discharge)
- $\pm 30\text{kV}$ ESD protection on each channel (HBM)
- Greater than 35dB attenuation (typical) at 1 GHz
- uDFN package with 0.40mm lead pitch:
 - 4-ch. = 8-lead uDFN
 - 6-ch. = 12-lead uDFN
 - 8-ch. = 16-lead uDFN
- Tiny uDFN package size:
 - 8-lead: 1.70mm x 1.35mm x 0.50mm
 - 12-lead: 2.50mm x 1.35mm x 0.50mm
 - 16-lead: 3.30mm x 1.35mm x 0.50mm
- Increased robustness against vertical impacts during manufacturing process
- Lead-free finishing, RoHS compliant

Applications

- LCD and Camera data lines in mobile handsets
- I/O port protection for mobile handsets, notebook computers, PDAs etc.
- EMI filtering for data ports in cell phones, PDAs or notebook computers.
- Wireless handsets
- Handheld PCs/PDAs
- LCD and camera modules

Product Description

The CM1631 is a family of pi-style EMI filter arrays with ESD protection, which integrates four, six, or eight filters (C-R-C) in a small form factor, uDFN 0.40mm pitch package. The CM1631 has component values of 15pF-100W-15pF per channel with a cut-off frequency of 120MHz, and can be used in applications with data rates up to 48Mbps. The device includes ESD diodes on every pin, that provide a very high level of protection for sensitive electronic components against possible electrostatic discharge (ESD). The ESD protection diodes safely dissipate ESD strikes of $\pm 15\text{kV}$, which is well beyond the maximum requirement of the IEC61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges greater than $\pm 30\text{kV}$.

These devices are particularly well-suited for portable electronics (e.g. wireless handsets, PDAs, notebook computers) because of their small package and easy-to-use pin assignments. In particular, the CM1631 is ideal for EMI filtering and protecting data and control lines for the I/O data ports, LCD display and camera interface in mobile handsets.

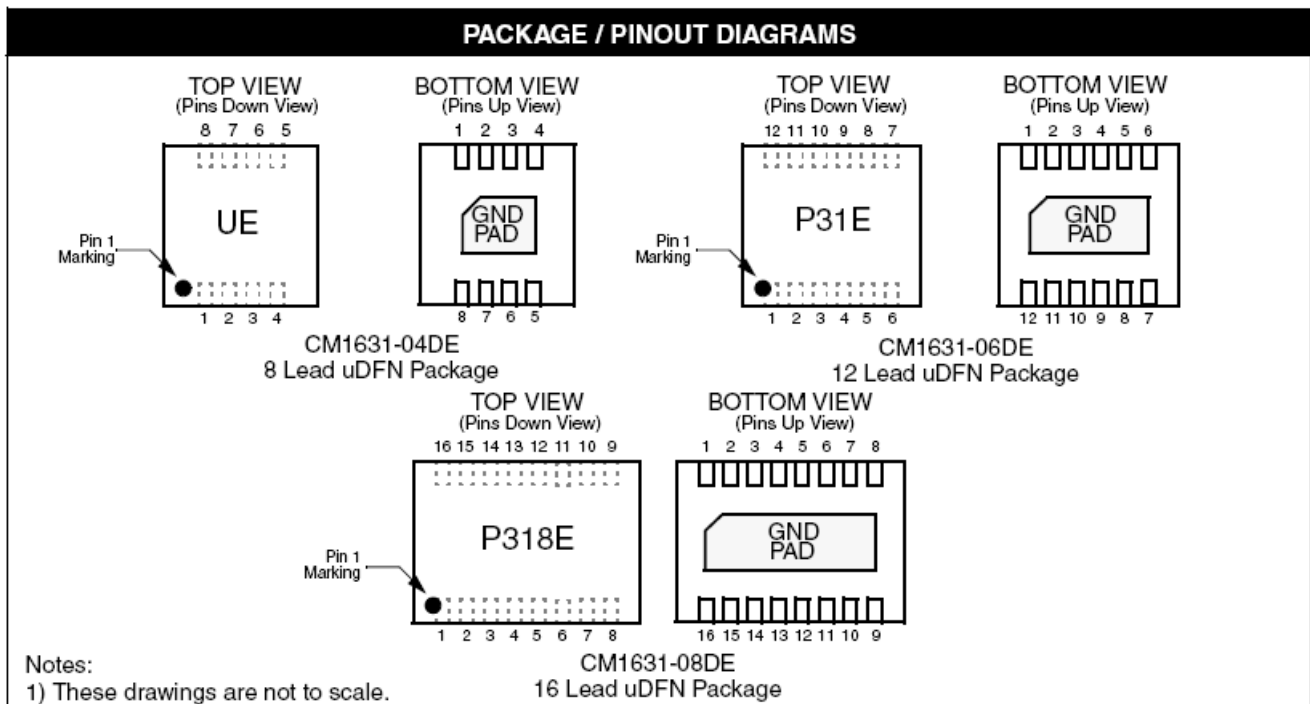

The CM1631 is housed in space-saving, ultra-low-profile 8-, 12- and 16-lead uDFN packages with a 0.40mm pitch and is available with lead-free finishing. This smaller size uDFN package provides up to 42% board space saving vs. the 0.50mm pitch uDFN packages.

Electrical Schematic

* See Package/Pinout Diagram for expanded pin information.

1 of 4, 6 or 8 EMI/RFI + ESD Channels
