## **Power MOSFET** 30 V, 46 A, Single N-Channel, µ8FL

### Features

- Low R<sub>DS(on)</sub> to Minimize Conduction Losses
- Low Capacitance to Minimize Driver Losses
- Optimized Gate Charge to Minimize Switching Losses
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

### Applications

- Low-Side DC-DC Converters
- Power Load Switch
- Notebook Battery Management
- Motor Control

### MAXIMUM RATINGS (T<sub>J</sub> = 25°C unless otherwise stated)

| Param  | Parameter              |                                 |                                      |                |    |

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability. 1. Surface-mounted on FR4 board using 1 sq-in pad, 1 oz Cu.

2. Surface-mounted on FR4 board using the minimum recommended pad size.
