PBYL2525CT, PBYL2525CTB series

FEATURES

- Low forward volt drop
- Fast switching
- Reverse surge capability
- High thermal cycling performance
- Low thermal resistance

SYMBOL

QUICK REFERENCE DATA

$$V_R = 20 \text{ V} / 25 \text{ V}$$
 $I_{O(AV)} = 25 \text{ A}$
 $V_F \le 0.43 \text{ V}$

GENERAL DESCRIPTION

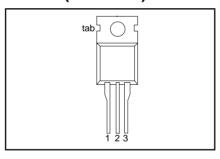

Dual schottky rectifier diodes intended for use as output rectifiers in low voltage, high frequency switched mode power supplies.

The PBYL2525CT series is supplied in the SOT78 (TO220AB) conventional leaded package. The PBYL2525CTB series is supplied in the SOT404 surface mounting package.

Limiting values

Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information

Where application information is given, it is advisory and does not form part of the specification.
