DESCRIPTION

The TDA8217A is a monolithic integrated color decoder for the PAL standard. It includes in a 20 pins IC all the functions required for the identification and demodulation of PAL signals, and all the videoprocessor functions up to the drive of the video stages. Used with STV8223 (video & sound IF system) and TDA8214B (H/V deflection circuit), this IC permits a complete low-cost solution for PAL applications.
