■ Precautions for Use

- (1) It is recommended that a by-pass capacitor of more than $0.01 \mu F$ be added between V_{CC} and GND near the device in order to stabilize power supply line.
- (2) In this product, the PWB is fixed with a resin cover, and cleaning solvent may remain inside the case; therefore, dip cleaning or ultrasonic cleaning is prohibited.
- (3) Remove dust or stains, using an air blower or a soft cloth moistened in cleaning solvent. However, do not perform the above cleaning using a soft cloth with cleaning solvent in the marking portion.
In this case, use only the following type of cleaning solvent used for wiping off:
Ethyl alcohol, Methyl alcohol, Isopropyl alcohol
When the cleaning solvents expect for specific materials are used, please consult us.
- (4) As for other general cautions, refer to the chapter "Precautions for Use" (Page 78 to 93)
