

Phase Locked VCO

Available 2-20GHz (Fixed frequency's)

Example 10.0 GHz

Features

Low phase noise
Internal voltage regulation
Small size
Custom designs available

TYPICAL PERFORMANCE SPECIFICATIONS

Output frequency:	10.0 GHz
Output power:	+3 to +17 dBm
Output power variation:	+/- 1.5 dBm
Typical Phase noise:	-95 dBc/Hz@10 KHz, -115 dBc/Hz@100 KHz
Spurious output:	< -65 dBc
Harmonics:	< -20 dBc
Reference frequency:	5 – 100 MHz
Frequency accuracy:	Same as reference
Frequency control:	No programming required
Size:	45 x 45 x 18 mm
Operating temperature:	-35°C to +80°C

Date Dec 18, 2006
