

DATA SHEET

SKY13434-002: 0.1 – 6.0 GHz SP3T/SPDT Wire-Bondable GaAs Die

Applications

- 802.11 a/b/g/n/ac WLAN networks
- Embedded modules

Features

- SP3T (2.5 GHz) and SPDT (5.0 GHz) switches with Bluetooth® capability
- Positive voltage control: 2.7 to 3.6 V
- Low insertion loss
- High isolation
- IP1dB: +33 dBm typical @ 2.4 GHz and 3 V
- Small GaAs die (60 micron square bond pads, 80 micron minimum pitch), 875 x 500 x 127 μm

Skyworks Green™ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to *Skyworks Definition of Green™*, document number SQ04-0074.

Description

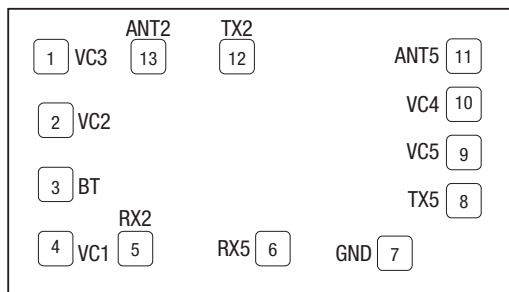

The SKY13434-002 is a GaAs pHEMT wire-bondable die. The device includes a Single-Pole, Triple-Throw (SP3T) antenna switch for 2.5 GHz transmit, receive, and Bluetooth operations, and a Single-Pole, Double-Throw (SPDT) antenna switch for 5 GHz transmit and receive operation.

Any of the RF ports can be used for any RF function regardless of the pad/signal name. Both of the antenna switches are fabricated on the same substrate.

The active path is selected using five positive voltage control lines: two control lines set the 5 GHz switch states and three control lines set the 2.5 GHz switch states. The switch requires external DC blocking capacitors on all RF paths.

The SKY13434-002 is provided as a bare die in an ultra-compact 875 x 500 x 127 μm design. Bond pad openings are 60 microns with a minimum pad pitch of 80 microns.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Table 2. SKY13434-002 Absolute Maximum Ratings

Parameter	Symbol	Minimum	Maximum	Units
Digital control voltage @ room temperature, normal operating power	V _{CTL}	-0.5	+5.0	V
RF input power, 2.5 GHz SP3T switch, OFDM modulated	P _{IN_2G}		+33	dBm
RF input power, 5.0 GHz SPDT switch, OFDM modulated	P _{IN_5G}		+29	dBm
RF input power, 5.0 GHz SPDT switch, CW, 1/8 duty cycle	P _{IN_5G_CW}		+30	dBm
Storage temperature	T _{STG}	-55	+150	°C

Note: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13434-002 are provided in Table 2. Electrical specifications are provided in Table 3.

The state of the SKY13434-002 is determined by the logic provided in Table 4.

Note: "1" = 2.7 V to 3.6 V. "0" = -0.2 V to +0.4 V. Any state other than described in this Table places the switch into an undefined state. An undefined state does not damage the device.

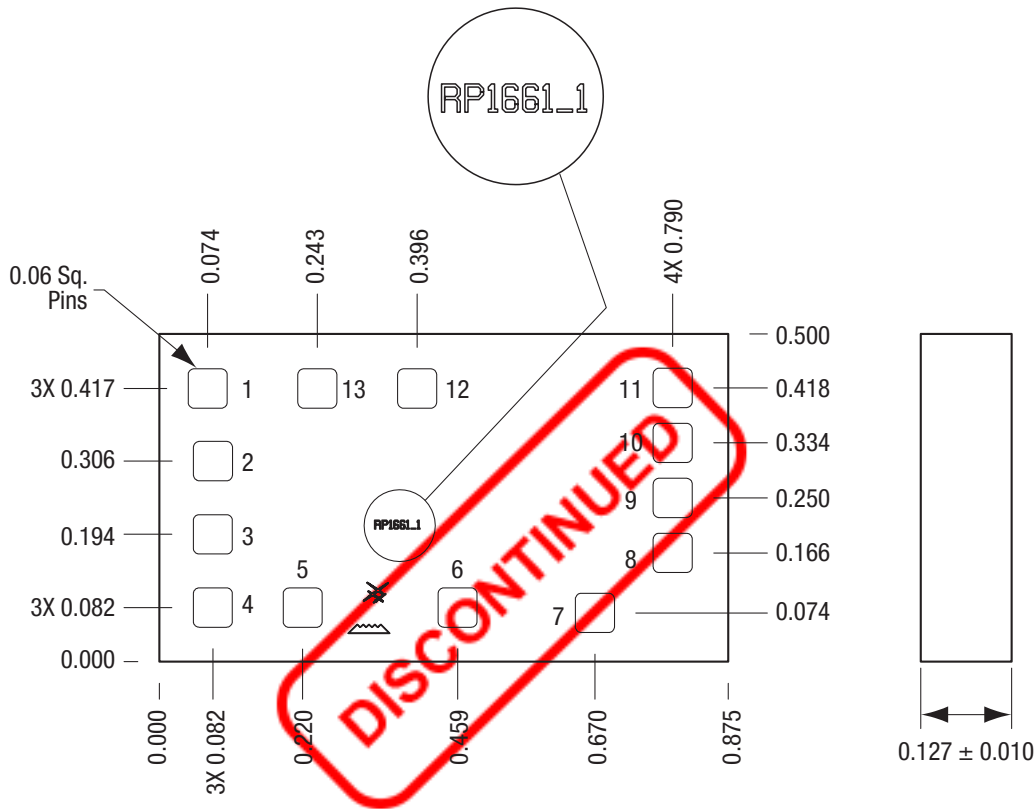

Package Dimensions

Package dimensions for the SKY13434-002 die are shown in Figure 3. The SKY13434-002 is shipped on a grip ring as illustrated in Figure 4.

Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SKY13434-002 has no backside metal and must be attached using conductive or non-conductive epoxy.

- Notes:
1. Bond pad metallization: Gold
 2. Backside metallization: None
 3. All measurements are in millimeters
