Description

The J210/211/212 n-channel JFETs are general-purpose and high-frequency amplifiers for a wide range of applications. These devices feature low leakage (I_{GSS} < 100 pA).

The TO-226AA (TO-92) plastic package, provides low cost and is available in tape-and-reel for automated assembly (see Packaging Information).

For similar dual products, see the 2N5911/5912 and U440/441 data sheets.
