

### Symbol LEDs in 2 x 5 mm Flat Tinted Top Diffused Package

Color	Type	Technology	Angle of half intensity $\pm\varphi$
High efficiency red	TLSH210.	GaAsP on GaP	50°
Yellow	TLSY210.	GaAsP on GaP	
Green	TLSG210.	GaP on GaP	

### Description

This series was developed for use as compact surface display. It is housed in a 2x5 mm rectangular molded package. This device has a flat tinted, top diffused package for uniform brightness when used in panels.

The symbol LEDs are available in three bright colors: high efficiency red, yellow and green.

### Features

- Choice of three bright colors
- Uniform illumination
- Luminous intensity selected into groups
- Suitable for DC and pulse operation
- Flat light emitting surface
- Direct symbol indication is possible
- Yellow and green color categorized
- Wide viewing angle

### Applications

Status lights  
Background illumination  
Maintenance lights  
Indicator of audio and visual equipment  
Off / On indicator  
Readout lights  
Legend lights  
Illumination of moving boards

## Ozone Depleting Substances Policy Statement

It is the policy of **TEMIC TELEFUNKEN microelectronic GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

**TEMIC TELEFUNKEN microelectronic GmbH** semiconductor division has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

**TEMIC** can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

**We reserve the right to make changes to improve technical design and may do so without further notice.**

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use TEMIC products for any unintended or unauthorized application, the buyer shall indemnify TEMIC against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
