**Patent pending on package assembly**

- 36V to 75V Input Range
- Programmable Output Voltage Range: 4.6V to 5.7V
- -40° to +100°C Operating Temp
- 1500 VDC Isolation
- 90% Efficiency
- Remote On/Off
- Differential Remote Sense
- N+1 Current Sharing
- Over-Current Protection
- Over-Temperature Protection
- Over-Voltage Protection
- Solderable Copper Case

The PT4483 Excalibur™ module combines state-of-the-art power conversion technology with un-paralleled flexibility. Operating off a standard 48V telecom input, the PT4483 provides a full 100W output at load currents up to 20A, and over the programmable output voltage range of 4.6V to 5.7V.

The PT4483 features high efficiency, ultra-fast transient response, and the capability for true N+1 current sharing. This product also includes output short circuit and over-temperature protection.

Standard Application

- C1 = Optional 33µF, 100V electrolytic capacitor
- For normal operation, pin 3 (Inhibit) must be connected to -Vin.
- Programming pins, VID1–VID4, are shown configured for $V_o=5.0V$
- For operation in N+1 configuration, consult the related application note.
- Pins 6 & 26 are used for N+1 configurations only

Specifications

Characteristics ($T_a=25^\circ\text{C}$ unless noted)	Symbols	Conditions ($V_{in}=48\text{V}$, $V_o=5.0\text{V}$ unless noted)	PT4483			
			Min	Typ	Max	Units

Ripple vs Output Current

Power Dissipation vs Output Current

Note A: All data listed in the above graphs has been developed from actual products tested at 25°C. This data is considered typical data for the DC-DC Converter.
Note B: SOA curves represent operating conditions at which the temperature of the metal case is at or below the maximum specified 100°C

Patent pending on package assembly

SLTS109

(Revised 10/31/2000)

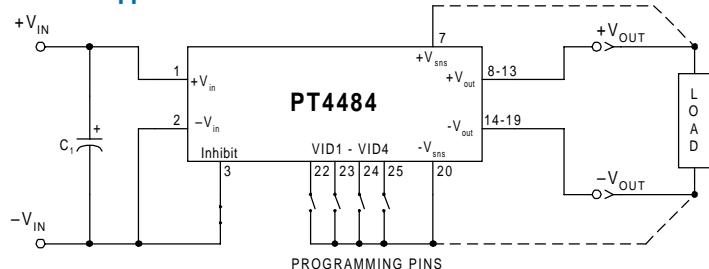

- Input Range: 36V to 75V
- Programmable Output Voltage Range: 4.6V to 5.7V
- Temp Range: -40° to +100°C
- 1500 VDC Isolation
- 90% Efficiency
- Remote On/Off
- Differential Remote Sense
- 40A Output with PT4498
- Over-Current Protection
- Over-Temperature Protection
- Over-Voltage Protection
- Solderable Copper Case

The PT4484 Excalibur™ module combines state-of-the-art power conversion technology with un-paralleled flexibility. Operating off a standard 48V telecom input, the PT4484 provides a full 100W output at load currents up to 20A, and over the programmable output voltage range of 4.6V to 5.7V.

The output may be increased to 40A when used with the compatible PT4498 booster module.

The PT4484 features high efficiencies, ultra-fast transient response, and output short circuit and over-temperature protection.

Standard Application

- C1 = Optional 33µF, 100V electrolytic capacitor
- For normal operation, pin 3 (Inhibit) must be connected to -Vin.
- Programming pins, VID1-VID4, are shown configured for $V_o=5.0V$
- For operation with a current booster, consult the PT4498 data sheet.
- Pins 4, 5, & 26 are used for booster applications only

PT4498—48V

20 Amp "Current Booster" for
PT4484 DC/DC Converter

Patent pending on package assembly

Power Trends Products
from Texas Instruments

EXCALIBUR

SLTS110

(Revised 10/31/2000)

- 20A Current Boost (Boosts PT4484 to 40A)
- Tracks V_{out} of PT4484
- Synchronized Operation
- High Efficiency
- Input Voltage: 36V to 75V
- 26-pin Copper Case Package

The PT4498 is a new high-performance 20A "Current Booster" for use with the PT4484 Excalibur™ DC/DC converter. The PT4498 adds a parallel output stage to the PT4484, allowing both to operate in perfect synchronization.

The PT4498 only operates with a PT4484 and is not a stand-alone product. Refer the PT4484 data sheet for the performance specifications. The booster uses the same 26-pin case and has the package options as the companion regulator.

25	N/C	25	N/C
26	DRV	26	

Standard Application

Input Capacitors: Although not necessary for stable operation, C_{in} will reduce input ripple. $C_{in} = 33\mu F$ is suggested.

Output Capacitors: A minimum of $330\mu F$ per PT4498 booster module is required for proper operation. Increasing C_{out} will reduce transients due to large and/or fast load steps.
