

- Input Voltage Range:  
4.75 to 7 Volts
- Complete Solution With Only  
One External Capacitor Required
- Soft Start

The Power Trends' PT5020 ISRs convert a positive input voltage (typ +5V) to a negative output voltage for a wide range of analog and communication circuit applications.

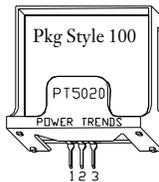

The Plus to Minus ISRs use a "Buck-Boost" topology and are packaged in the 3 pin SIP configuration.

**Standard Application**

**Pin-Out Information**

| Pin | Function  |
|-----|-----------|
| 1   | $V_{in}$  |
| 2   | GND       |
| 3   | $V_{out}$ |

**Ordering Information**

- PT5021 □ = -3.3 Volts
- PT5022 □ = -5 Volts
- PT5023 □ = -9 Volts
- PT5024 □ = -12 Volts
- PT5025 □ = -15 Volts
- PT5026 □ = -5.2 Volts
- PT5027 □ = -8.0 Volts
- PT5028 □ = -6.5 Volts
- PT5029 □ = -5.5 Volts
- PT5030 □ = -6.0 Volts
- PT5031 □ = -1.7 Volts

**PT Series Suffix (PT12345X)**

| Case/Pin Configuration   | Suffix |
|--------------------------|--------|
| Vertical Through-Hole    | N      |
| Horizontal Through-Hole  | A      |
| Horizontal Surface Mount | C      |

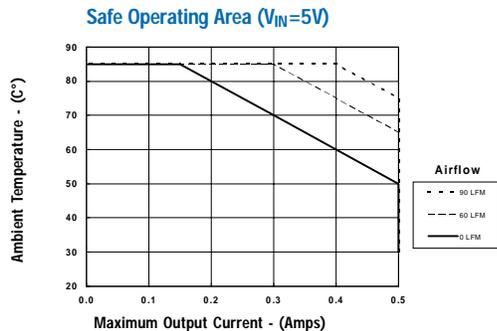

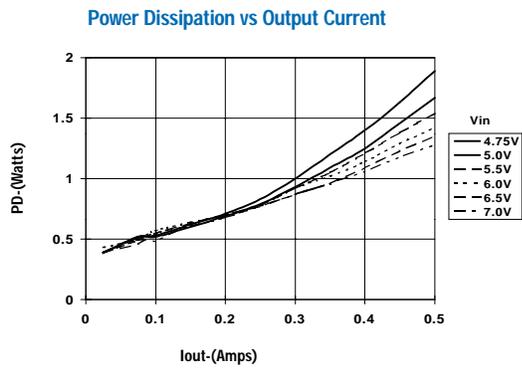

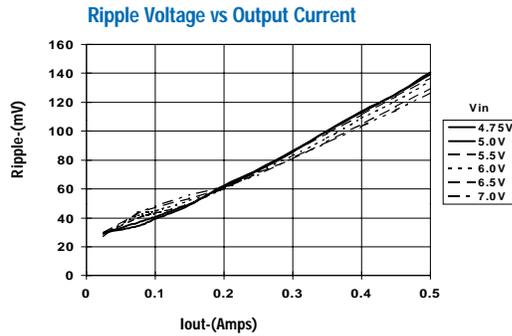

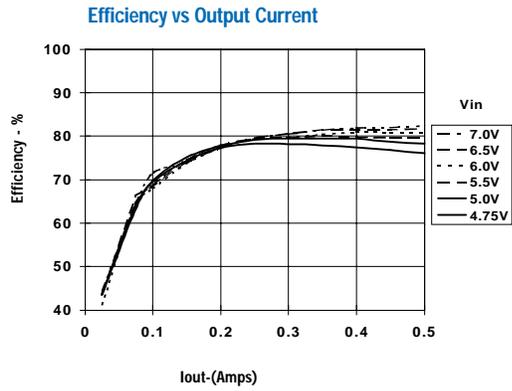

**Specifications**

NOTE: Buck-Boost Topology ISRs are not Short-Circuit Protected.

\* ISR will operate down to no load with reduced specifications.  
\*\* For applications with input voltages greater than 7 VDC, use the PT78NR100 Series.  
\*\*\* See SOA Curves.

PT5024 (-12VDC) (See Note 1)

PT5022 (-5VDC) (See Note 1)

Note 1: All data listed in the above graphs has been developed from actual products tested at 25°C. This data is considered typical data for the ISR.
