It is certified that our instruments are accurately calibrated by accepted metrological techniques, utilizing test equipment of sufficient accuracy to assure that the instrument meets all published specifications under laboratory conditions. Measurement data pertinent to certified calibration are available from Micro-Measurements upon written request.

Standards used to obtain and certify measurement data are periodically calibrated. Basic DC accuracy, where applicable, is verified with the precision test equipment, or through internally maintained Micro-Measurements Model 1550(A) Strain Indicator Calibrators, whose calibrations are traceable to the National Institute of Standards and Technology (NIST).
