

# 1155 WasteWeigh

packed with benefits as standard

**NEW**

**CB**  
Digital  
CANbus

**M**  
Analogue

DIN radio  
mount indicator

## Includes barrier control as well as packer plate shutdown

### High accuracy with lasting reliability

Specifically engineered on-board weighing systems for refuse collection vehicles. The durable WasteWeigh system is designed for high accuracy in rugged environments.

### 1155 digital weight indicator

Specially engineered for on-board use, the 1155 digital indicator is a versatile display designed to suit a variety of trucks from 17 tonne to 32 tonne GVW.

### AxleWatch

Axle weights are displayed, alerting the driver to any axle overload infringement.

### Mounting versatility

The 1155 is suitable for DIN radio mount, dash mount or trailer mount.

### Packer plate shutdown

For full control - packer plate shutdown linked to net payload makes sure overloading is prevented.

### Key switch

Where the packer plate shutdown option is used, an override key switch allows the compaction unit to be switched back on by an authorised person.

### Barrier control

Rear axles are susceptible to overloading. The intelligent barrier system drives the barrier and load forward to a safe position when the rear axles are near to maximum loading.

## UK's largest provider of on-board load control and overload protection systems

DIN radio mount

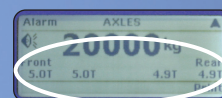

Dash mount

Gross vehicle weight

Net payload weight

Axle weights

# Buy the 1155 and reap the benefits instantly

## Benefits and Features

- High accuracy +/- 1% FSD or better
- Overload alarm, audible or visual
- Simple to operate
- Rugged for off-road use
- 17 - 50 tonnes GVW
- Packer plate shutdown
- Barrier control
- Key Switch

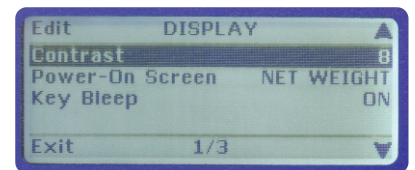

Load deliver or collection

Easy to set-up menus

Alarm set points

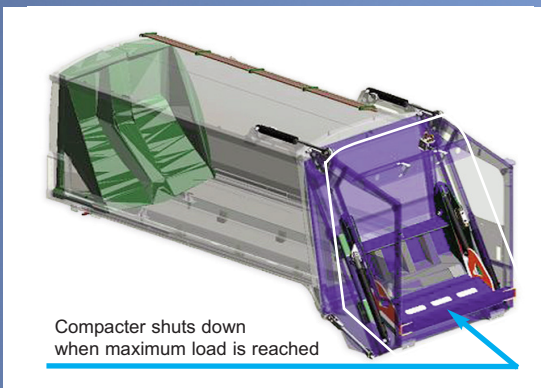

User defined display

## Retro-compatibility

The 1155 automatically detects whether analogue or digital CANbus signals are being used. This means complete compatibility for new and existing systems, enabling easy-to-read on-screen fault messages should a problem occur.

Features	Standard	Option
