

DEVICE: SC-70 for Si Part Numbers

- = Pin 1 Indicator¹
- AB = Part Number Code^{2, 3, 4}
- W = Week Code⁴
- LL = Lot Code

NOTES:

1. For dual symmetrical SC-70, additional dot will be marked at top right corner (pin 4).
2. See data sheet for code.
3. Assembly Factory Code is denoted by a bar around the first part number code character.
4. Year Code is designated by a bar around the second part number code character and/or week code.

The current marking strategy is reflected. Contact your local sales representative for historical marking strategies for these packages.
