

**DEVICE:** SC-70 for TN, TP, TC and DG Part Numbers

- = Pin 1 Indicator<sup>1</sup>
- A = Part Number Code<sup>2, 3, 4</sup>
- W = Week Code<sup>4</sup>
- L = Lot Code

NOTES:

1. For dual symmetrical SC-70 MOSFETs, additional dot will be marked at top right corner (pin 4).
2. See data sheet for code.
3. May be one or two characters.
4. Year Code is designated by a bar around the part number and week code for MOSFETs. For DG part numbers, year code is denoted by a bar around the week code and factory code is denoted by a bar around the part number.

The current marking strategy is reflected. Contact your local sales representative for historical marking strategies for these packages.
