ISBN 3-7723-6093-9

## EINLEITUNG

Der Zweck der vorliegenden Ausgabe ist es, dem Benutzer beim Suchen eines Ersatztyps einer Spezial-Diode (einschließlich Thyristoren, Diacs, Triacs sowie helllichtempfindlichen Halbleitern, ausschließlich Fototransistoren) zu helfen.

Im Gegensatz zu den Elektronenröhren, von denen kaum noch gesprochen wird, gibt es für die Halbleiter direkte Ersatz- und Äquivalenttypen.

Viele Typen sind mit einem Stern (\*) oder mit ( ) markiert, was bedeutet, daß sie nicht genau identisch mit den Typen in Spalte 1 sind.

In viel Fällen wiesen die in Spalte 5 bis 7 aufgeführten Typen kleine Unterschiede zu den Type in Spalte 1 auf, wie Z. B. in den Kenndaten, Abmessungen, zulässigem Strom, der Verlustleistung oder in anderen charakteristischen mechanischen und elektrischen Daten.

Deshalb ist es empfehlenswert, in Zweifelsfällen alle Eigenschaften des gefundenen Typs mit den vollständigen Daten in einem Handbuch (z. B. Semiconductor Handbook, Diodes, herausgegeben von Muiderkring B.V., Bussum, Niederlande) zu vergleichen.

Seit es helllichtempfindliche Halbleiter gibt, und seit sie von den Herstellern in großen Mengen auf den Markt gebracht wurden, bringen es die elektrischen und mechanischen Unterschiede mit sich, daß die Halbleiter untereinander nicht identisch sind.

Diese Vergleichstabelle wurde sehr sorgfältig erstellt, indem Details von den Herstellern ergänzt wurden. Allerdings können die Herausgeber für eventuelle Fehler die auftreten können, kleine Verantwortung übernehmen.

TYPE	1	2	3	EUROPEAN	AMERICAN	JAPANESE

## INLEIDING

Deze uitgave wil de gebruiker behulpzaam zijn bij het zoeken naar een vervangtype voor een bepaalde diode (inclusief thyristors, diacs, triacs, lichtgevende en lichtgevoelige halfgeleiders met uitzondering van fototransistoren).

Anders dan bij elektronenbuizen kan men bij halfgeleiders vrijwel nooit van directe vervangtypen of "equivalenten" spreken. Veel typen zijn voorzien van een sterretje (\*) of ( ) wat wil zeggen dat deze niet exact identiek zijn aan het type van kolom 1. In veel gevallen willen de typen in de kolommen 5 t/m 7 kleine verschillen vertonen ten opzichte van die in kolom 1, b.v. que karakteristieken, afmetingen, toelaatbare stroom, dissipatie of een ander mechanisch of elektrisch kenmerk.

Het verdient dan ook aanbeveling, – zeker in twijfelgevallen –, om alle eigenschappen van het gevonden type te controleren aan de hand van de volledige specificatie in een handboek (b.v. Semiconductor Handbook, Dioden, uitgegeven door de Muiderkring B.V. Bussum, Holland).

Sinds de lichtgevende en lichtgevoelige halfgeleiders een nieuw gebied bestrijken en deze door vele fabrikanten op de markt worden gebracht, zullen de elektrische en mechanische afwijkingen niet inhouden dat de halfgeleiders niet aan elkaar gelijk zijn.

Deze vergelijkingstabellen werden met de grootste zorg samengesteld, waarbij van fabrieksgegevens gebruik werd gemaakt. De uitgeefster kan zich dan ook niet aansprakelijk stellen voor eventueel voorkomende onjuistheden.

- 7) Japans vergelijkbaar type

## INTRODUCTION

The purpose of the present edition is to assist the user in tracing a replacement type for a special diode (inclusive of thyristors, diacs, triacs, luminous and light-sensitive semiconductors, with the exception of phototransistors).

Contrarily to electron valves, there may hardly ever be spoken, with regard to the semiconductors, of direct replacement types or "equivalents".

Many types are marked with an asterisk(\*) or ( ) which means that they are not exactly identical with the type mentioned in column 1.

In many cases, the types in the columns 5 up to and including 7 may show small differences with regard to those stated in column 1, e.g. as far as characteristics, dimensions, admissible current, dissipation or any other mechanical or electrical characteristic features are concerned.

Therefore, it would be recommendable, – anyhow in cases of doubt – to control all properties of the type found, on the basis of the complete specification comprised in a handbook (e.g. Semiconductor Handbook, Diodes, published by Muiderkring B.V., Bussum, Netherlands).

Since the luminous and light-sensitive semiconductors have been covering a new area and since they have been put on the market by a great number of manufacturers, the electrical and mechanical differences will not imply that the semiconductors would not be identical with each other.

These comparison tables were composed most carefully, on the basis of details supplied by the manufacturer. Consequently, the publishers cannot accept any responsibility for any incorrectness which, eventually, still might occur.

## INTRODUCTION

Le propos de la présente édition est d'assister les usagers au remplacement des diodes (inclus les Thyristors, diacs, triacs, diodes électro luminescentes à l'exception des phot transistors).

Contrairement aux tubes électroniques, il est beaucoup plus difficile trouver une équivalence exacte de transistors, plusieurs types marqués d'un "astérisque" (\*) ou ( ) qui veut dire que ce n'est pas le type exact que celui qui est mentionné dans la colonne I. Dans certain cas les types incrit dans les colonnes 5 jusqu'a 7 inclue montrent quelques petites différences en regard de ceux inclus dans la colonne. I. Ainsi les caractéristiques, - dismensions, courant admissible, dissipation, ou autres caractéristiques électriques ou mécaniques sont consernées.

Dans ce cas il sera recommandable, en cas de doute de vérifier les propriétés du type trouvé dans un livre spécialisé soit – Handbook - E.G. Semiconducteurs diodes, published by Muiderkring B.V. Bussum, Netherlands.

Depuis que les semiconducteurs électroluminescents couvrent une grande étendue et qu'ils ont été placés sur le marché par un grand nombre de fabricants, les différences électriques et mécaniques n'impliquent pas que ces semiconducteurs ne soient pas identiques les uns les autres.

Les comparaisons ont été soigneusement sur la base des détails fournis par les fabricants.

En conséquence l'editeur responsabilité pour les erreurs pouvant être éventuellement relevées.
