Eaton/Ailtech 2075-2A version SU-6 Firmware.

The Eaton/Ailtech 2075-2A Noise Figure Meter is supplied with firmware installed in six 2764 EPROM's in position U7 – U12 on the A1A2A4 ROM Board, shown below. The manual lists firmware versions SU-5 and SU-6 as possibilities. Special Function 8.1 followed by ENTER will display the meters installed firmware version. The manual also includes a way to check each EPROM's CHECKSUM, both individually and collectively, via Special Function 33.1 – 33.7. The CHECKSUM of the particular EPROM is also shown on its label.

Included in this file are the contents of these six EPROM's with firmware version SU-6.
