SECTION 1

INTRODUCTION

1-1. GENERAL

This Illustrated Parts Breakdown (IPB) lists and illustrates the field-replaceable parts for the SPERRY UNIVAC Remote Keystation Adapter Type 8596-00 thru -03.

The IPB consists of five sections.

- Section 1. Introduction. This section contains information on how to use the IPB.
- Section 2. Illustrations/Group Assembly Parts List. This section consists of pictorial breakdowns and indexed parts lists of all assemblies in the unit.
- Section 3. Reference Designation Index. This section is a list of parts for which a reference designation is given in the parts list. The parts are listed in alphanumeric order by schematic reference designation; figure and index numbers are given to aid in locating the part in the parts list in Section 2.
- Section 4. Numerical Index. This section provides a numerical list of all part numbers in the IPB. The figure and index number are given for each part to aid in locating the part in the parts list in Section 2. Attaching hardware is not listed in the Numerical Index.
- Section 5. Attaching Hardware. This section provides a numerical listing of all attaching hardware listed in Section 2.

1-2. HOW TO USE THE IPB

1-3. FIGURE/ASSEMBLY LOCATOR (FIGURE A)

Figure A is provided as a quick reference to indicate the figure which breaks down a particular assembly. Indented figure numbers are subassemblies of the figure under which they are indented.

EXAMPLE: Figure/Assembly Locator

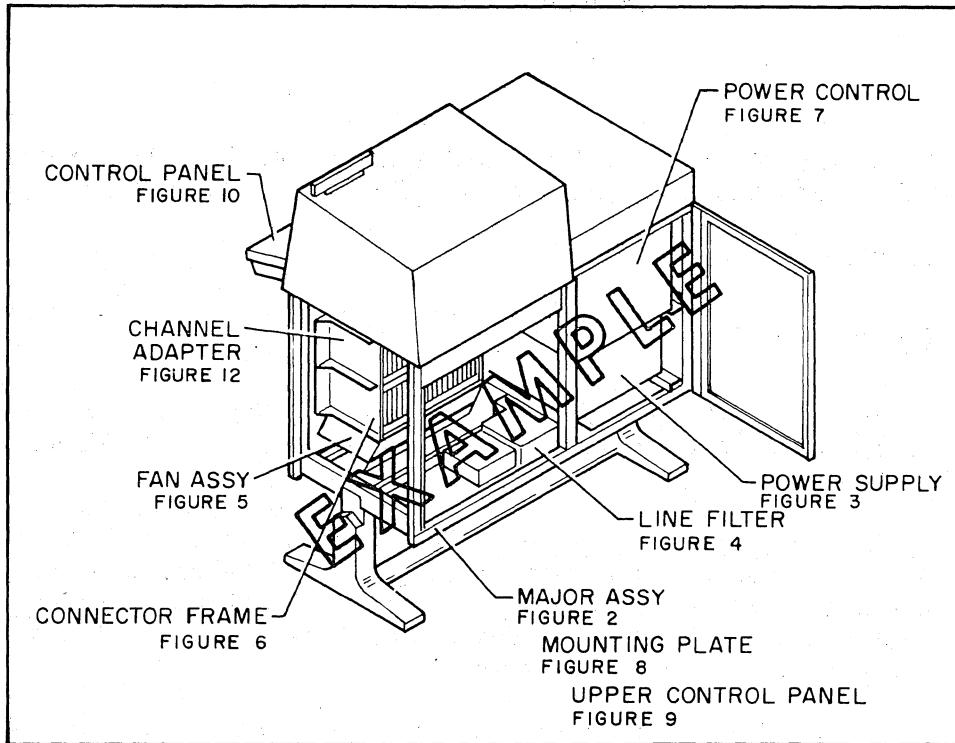

Figure A. Figure/Assembly Locator

1-4. ILLUSTRATION AND PARTS LIST

The callouts on the Illustration and Parts List shown have the following significance:

ILLUSTRATION

- A - A circled index number indicates an assembly which has its parts illustrated on the same figure. If the circled number has a figure notation next to it, its parts are shown on the indicated figure.
- B - "REF" on the illustration means that particular item has been shown on another area of the same figure and is shown at this point for reference only.

PARTS LIST

C - FIGURE & INDEX NO.

The digits preceding the hyphen refer to the figure number illustrating the particular assembly. The digits after the hyphen provide a reference between the indented parts list and the callout number on the associated illustration.

D - PART NUMBER

This column contains the Sperry Univac part number for the item listed. "NO NUMBER" indicates the item should not be ordered. A number with a suffix "-XX" means the part number is variable and a selection must be made.

E - REFERENCE DESIGNATION

A unique designation which is assigned by schematic diagrams for the item listed.

F - DESCRIPTION INDENTION SYSTEM

The numbers in the description header indicate the relationship of parts as shown by the dots preceding the description. An item preceded by two dots is part of the last one-dot assembly above it; a three-dot item is part of the last two-dot assembly above it; etc.

G - NUMBER-PER-ASSEMBLY

This is the quantity of indexed parts used on the next higher assembly. "REF" in this column means the assembly has already been listed with its quantity in a preceding figure. "AR" in this column means "AS REQUIRED" and is used when the quantity is unspecified or variable. "NP" means the part is non-procurable.

H - ATTACHING HARDWARE

The part numbers following the asterisk (*) are the items needed to attach the indexed part. A numerical listing of all the attaching hardware, used in this book, can be found in Section 5.

I - FIGURE ASSEMBLY ATTACHING HARDWARE

The attaching hardware for the assembly listed as the figure are found on the next higher assembly indicated.

J - ACTIVELY SUPPORTED PART NUMBERS

A "#" symbol in this column indicates that the part is active in the WDC supply system. If an order is accepted for a part that does not have an indicator (#), the part will have to be sourced by WDC.

Introduction

K - USED-ON-CODE

If this column is blank, the part is applicable for all units in this book. A letter or group of letters designate the unique variable part or feature for which a selection must be made. The letters have the following significance:

USED-ON-CODE	DESCRIPTION
1	T8598-00 Remote Keystation Adapter (Local) 50/60 Hz 100-120V
2	T8598-01 Remote Keystation Adapter (Local) 50/60 Hz 200-240V
3	T8598-02 Remote Keystation Adapter (Remote) 50/60 Hz 100-120V
4	T8598-03 Remote Keystation Adapter (Remote) 50/60 Hz 200-240V
A	F3312-00 Remote Printer Interface
