1.1 Outline of Product

1. GENERAL DESCRIPTION

1.1 Outline of Product

R3951A is S parameter test set measuring transmission and reflection characteristics of two-port device and connected to R3751A or R4611 Network Analyzer.

Forward and reverse transmission and reflection characteristics can be measured simultaneously without disconnecting the device from the test port.

1.2 Check of Attachments

1.2 Check of Attachments

Upon receipt of this equipment, run checks thereon as shown below.

- ① Run visual checks against any and all damages or imperfections.
- ② Check the quantity and rating of standard accessories to assure their conformance with Table 1-1.

Should there be any flaw, or damage, or missing or insufficient part, contact the nearest dealer or the sales and support offices.

Request to User: When ordering add-on attachments and the like, be good enough to stipulate the model (or stock) No. concerned.

4.1 Measuring of S_{11} and S_{22}

4. MEASUREMENT

4.1 Measuring of S_{11} and S_{22}

Reflection characteristics can be measured.

Measuring of S_{11} : Measures reflection characteristics for the device connected to test port 1.

Measuring of S_{22} : Measures reflection characteristics for the device connected to test port 2.

Operating procedures are shown as follows.

(1) Initial set-up

The frequency band of the instrument is from 100kHz.
Operate the key on the front panel of R3751A or R4611.

- ① Press START 1 0 0 kHz INPUT MEAS.
- ② press S11 (A/R)
REFL FWD for measuring S_{11} .
- Press S22 (B/R)
REFL REV for measuring S_{22} .

4.2 Measuring of S_{21} and S_{12}

4.2 Measuring of S_{21} and S_{12}

This is the measurement of transmission characteristics.

Measuring of S_{21} : Connect the device between TEST PORT 1 and 2, and measure the transmission characteristics in the direction from TEST PORT 1 to 2.

Measuring of S_{12} : Connect the device between TEST PORT 1 and 2, and measure the transmission characteristics in the direction from TEST PORT 2 to 1.

Operating procedures are shown as follows.

(1) Operate the key on the front panel of R3751A or R4611.

- ① Press INPUT
MEAS .
- ② Press S21 (B/R)
TRNS FWD for measuring S_{21} .
- ③ Press S12 (A/R)

5. Explanation of Performances

(2) Explanation of Performances

① Measurement of Reflection

The input signal through <INPUT> passes through the route → or → and outputs to Part 1 to 2. Reflecting component is output to "OUTPUT A" or "OUTPUT B". The network analyzer will then compare the output of "OUTPUT R" and "OUTPUT A" or "OUTPUT B", and indicate the results.

② Measurement of Transmission

The input signal through <INPUT> passes through the route → or → and is output to "OUTPUT B" or "OUTPUT A". The network analyzer will then compare the output of "OUTPUT R" and "OUTPUT B" or "OUTPUT A", and indicate the results.

APPENDIX

A.1 Softkey Menu List

The following shows softkey menu construction (common) of R3751A and R4611 with S parameter test set.

(1) Softkey Menu of INPUT MEAS

R3951A

A.1 Softkey Menu List

The coordinates for complex impedance and admittance will be executed by the following calculation:

$$Z(\text{REFL}) = \frac{1+\Gamma}{1-\Gamma} Z_0 = R+jX \quad Y(\text{REFL}) = \frac{1-\Gamma}{1+\Gamma} \times \frac{1}{Z_0} = G+jB$$

On the basis of complex reflection coefficient Γ obtained from set-up input (A/R, B/R, A/B, R, A, B ...). So it will be necessary for input to set up the reflection coefficient measuring of DUT.

A.1 Softkey Menu List

(2) Softkey Menu of CAL

NORMALIZE Excludes the frequency characteristic of measuring system.
1 PORT FULLCAL Goes to 1 port calibration menu. This function calibrates the reflection measurement with the external bridge.
CORRECT ON/OFF ON/OFF for NORMALIZE or calibration 1 port. But it is necessary to execute NORMALIZE or OPEN, SHORT, LOAD and DONE.
E. LENGTH ON/OFF ON/OFF for correction of electrical length.
E. LENGTH VALUE Electrical length is entered by data key. Electrical length will be performed for the results of the set-up of INPUT MEAS and AVG.

OPEN After opening test port, press this softkey. The reflection characteristic at OPEN will be saved in the internal memory.
SHORT After short-circuiting test port, press this softkey. The reflection characteristic at SHORT will be saved in the internal memory.
LOAD After connecting the terminator having characteristic impedance to test port, press this softkey. The reflection characteristic by LOAD will be saved in the internal memory.
CLEAR Clears CAL DATA.
DONE The error will be calculated internally by each reflection characteristic obtained by OPEN, SHORT and LOAD, and then the system goes to CORRECT ON automatically.
RETURN Returns to the first page of the menu.

(2) For any dispute between you and any third party for any reason whatsoever including, but not limited to, infringement of intellectual property rights.

LIMITED WARRANTY

1. Unless otherwise specifically agreed by Seller and Purchaser in writing, Advantest will warrant to the Purchaser that during the Warranty Period this Product (other than consumables included in the Product) will be free from defects in material and workmanship and shall conform to the specifications set forth in this Operation Manual.
2. The warranty period for the Product (the "Warranty Period") will be a period of one year commencing on the delivery date of the Product.
3. If the Product is found to be defective during the Warranty Period, Advantest will, at its option and in its sole and absolute discretion, either (a) repair the defective Product or part or component thereof or (b) replace the defective Product or part or component thereof, in either case at Advantest's sole cost and expense.
4. This limited warranty will not apply to defects or damage to the Product or any part or component thereof resulting from any of the following:
 - (a) any modifications, maintenance or repairs other than modifications, maintenance or repairs (i) performed by Advantest or (ii) specifically recommended or authorized by Advantest and performed in accordance with Advantest's instructions;
 - (b) any improper or inadequate handling, carriage or storage of the Product by the Purchaser or any third party (other than Advantest or its agents);
 - (c) use of the Product under operating conditions or environments different than those specified in the Operation Manual or recommended by Advantest, including, without limitation, (i) instances where the Product has been subjected to physical stress or electrical voltage exceeding the permissible range and (ii) instances where the corrosion of electrical circuits or other deterioration was accelerated by exposure to corrosive gases or dusty environments;
 - (d) use of the Product in connection with software, interfaces, products or parts other than software, interfaces, products or parts supplied or recommended by Advantest;
 - (e) incorporation in the Product of any parts or components (i) provided by Purchaser or (ii) provided by a third party at the request or direction of Purchaser or due to specifications or designs supplied by Purchaser (including, without limitation, any degradation in performance of such parts or components);
 - (f) Advantest's incorporation or use of any specifications or designs supplied by Purchaser;
 - (g) the occurrence of an event of force majeure, including, without limitation, fire, explosion, geological change, storm, flood, earthquake, tidal wave, lightning or act of war; or
 - (h) any negligent act or omission of the Purchaser or any third party other than Advantest.

CUSTOMER SERVICE DESCRIPTION

In order to maintain safe and trouble-free operation of the Product and to prevent the incurrence of unnecessary costs and expenses, Advantest recommends a regular preventive maintenance program under its maintenance agreement.

Advantest's maintenance agreement provides the Purchaser on-site and off-site maintenance, parts, maintenance machinery, regular inspections, and telephone support and will last a maximum of ten years from the date the delivery of the Product. For specific details of the services provided under the maintenance agreement, please contact the nearest Advantest office listed at the end of this Operation Manual or Advantest's sales representatives.

Some of the components and parts of this Product have a limited operating life (such as, electrical and mechanical parts, fan motors, unit power supply, etc.). Accordingly, these components and parts will have to be replaced on a periodic basis. If the operating life of a component or part has expired and such component or part has not been replaced, there is a possibility that the Product will not perform properly. Additionally, if the operating life of a component or part has expired and continued use of such component or part damages the Product, the Product may not be repairable. Please contact the nearest Advantest office listed at the end of this Operation Manual or Advantest's sales representatives to determine the operating life of a specific component or part, as the operating life may vary depending on various factors such as operating condition and usage environment.
