Close Out. Get Paid. Get to the Next Job Fast.

# SkyBridge Tools™ Trace Manager

**Close Out. Get Paid. Get to the Next Job Fast.**

SkyBridge Tools™ Trace Manager is a cloud-based automated trace judgment service designed to simplify your life. This easy-to-use and affordable essential service helps everyone involved in cell tower or in-building antenna or DAS system testing communicate tasks, validate measurements, and deliver accurate, timely results.

## Efficient Trace Management to Create Fully Validated Traces

Validating fiber, passive intermodulation (PIM), cable, and antenna tests can be cumbersome and time consuming. Before you can get paid, each deliverable must be verified and documented.

SkyBridge Tools effortlessly validates measurements in a fraction of the time it takes to do so manually.

## Communicate

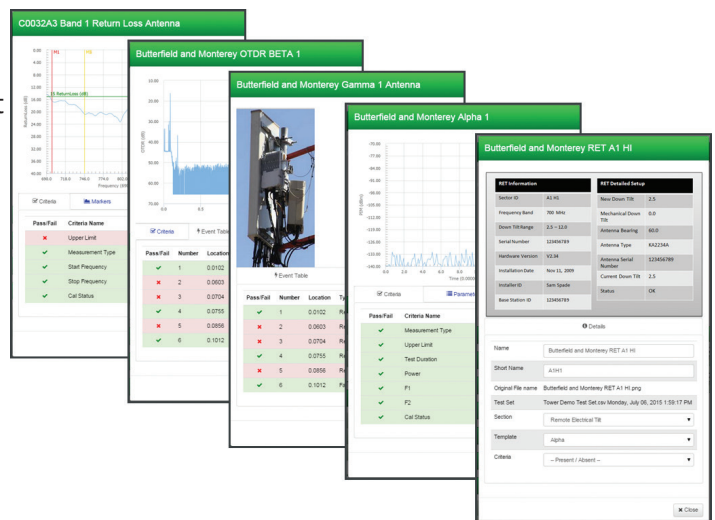

### Build Stronger, More Efficient Teams

Antenna system installation happens faster and more efficiently when every member of the team knows what needs to be done.

With SkyBridge, site technicians get information real-time. As they upload test data, pass/fail results are clear and easy to read, eliminating confusion and reducing project management involvement.

Up in the Cloud, SkyBridge Tools sets up a specific, easy-to-access record for every deliverable, including line sweep traces, OTDR traces, PIM traces, site photos, and any required construction documents. With access from anywhere at anytime, the whole team can make sure the job gets done well and on time.

More accurate and immediate results mean less rework. This also means the technician gets to the next job sooner, improving business cash flow.

## Validate

### Save Time and Close Out Fast

Once uploaded to the SkyBridge Tools Cloud, trace data is automatically judged and tracked based on user-provided criteria.

In addition, these traces can have limit lines, markers, and final file names set automatically based on the criteria that work best for you. Photos, documents and any PDFs can be marked as present or absent, renamed as desired, and show up in a job dashboard. From the dashboard screen, it's easy to drill down to look at results in detail.

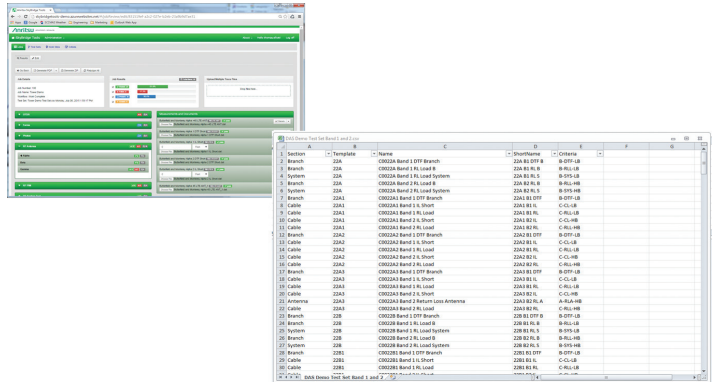

# SkyBridge Tools™ Trace Manager

## Quickly Prove Work is Done and Get Paid

### Deliver

#### Rapidly Send Customer Reports

SkyBridge Tools™ provides secure 24/7 data access from anywhere. With test results and documentation expertly and securely stored in the Cloud, users that you authorize can easily access and download job status, PDF reports, trace files and other close out documentation.

## SkyBridge Tools™ Trace Manager Benefits

### Reliable and timely payment for work done

- ▶ Create fully validated traces
  - Automatically judge traces: present/absent and pass/fail
  - Automatically Setup on:
    - Limit line placement
    - Marker placement
    - Trace title or subtitle renaming
    - Trace renaming
- ▶ Semi-automated photo renaming
- ▶ Job-based reporting via PDF or ZIP files

### Reduce rework

- ▶ Optional setup file distribution allows accurate test execution
- ▶ Crew sees accurate results at upload time
- ▶ Project manager sees accurate and validated results at upload time

### Saving You Time

#### Supporting Your Business

SkyBridge Tools Trace Manager was especially designed for businesses that need to show that their work is complete before they are paid.

These businesses include cellular or public safety contractors/owners/operators dealing with tower-mounted or in-building (DAS) systems.

In-building DAS system installers benefit from SkyBridge Tools because it automates the collection and validation of thousands of traces.
