

MS9020D

Optical Loss Test Set

The MS9020D is a handy optical measuring instrument which incorporates an LED and an LD light sources and an optical power meter. It can also be used for fiber break point and return loss measurement. Every unit of the LED source, the LD source, the sensors and the return loss measurement unit is a plug-in type, for easy exchange and highest suitability for field use.

The MS9020D covers 0.66 μm , 0.85 μm , 1.3 μm and 1.55 μm bands for optical loss measurement. In addition to the CW

mode, it provides a modulated light mode with 270 Hz, 1 kHz and 2 kHz modulation signals. Therefore, it is possible to measure optical loss over a wide dynamic range without stray light effect. For return loss, 1.3 μm band single mode fibers can be measured in 0 to 40 dB range. As a power meter, every sensor has a wavelength calibration function of 5 nm steps at three wavelengths, so absolute values can be read directly.

Major Features

- **Measures CW and modulated light**

In addition to CW light mode the MS9020D provides modulated light functions with modulation signal frequencies of 270 kHz, 1 kHz, 2 kHz, so a wide range measurement is possible without stray light.

- **Light source with switchable wavelength**

One each of two wavelengths 0.85/1.3 μm and 1.3/1.55 μm can be switched easily (LD and LED).

- **Provides calibration function of 5 nm steps at three wavelengths**

- **Also measures optical return loss (0 to 40 dB)**

In combination with the MS0907A unit, optical return loss of SM fiber connector and optical parts can be measured easily.

- **High power input and return loss, and low polarization dependency**

The MA9622A Optical Sensor can handle optical inputs of up to +23 dBm in the 1.55 μm band, and has a return loss

of better than 40 dB as well as a polarization dependency of only 0.1 dB. It is ideal for measure in the optical output of repeaters using EDFAs. Furthermore, the removable input connector makes cleaning easy.

- **Visible light source for fiber identification in SM fibers**

Fiber identification and break point by naked eye in fibers up to 5 km long can be easily detected using the 0.635 μm visible light source. In addition, the optical output has a flickering light function to make visual fiber identification more easier.

- **Operates in three modes**

Operates using AC, Ni-Cd rechargeable battery and Alkali/Manganese cells

- **Various connectors**

The MS9020D can be connected quickly to FC, ST, DIN, HMS-10/A, and SC connectors just by changing the connector adaptor.

Applications

- **Optical fiber loss measurement**

Two MS9020Ds can be used to measure the loss of an installed optical fiber. Loss measurement at 1.3 μm and 1.55 μm is a one-touch operation when the MS0904A/0909A (1.3/1.55 μm Switchable LED/LD Source) is used. When the LD light source is used, a loss of up to 67 dB can be measured.

- **Fiber identification for SM fiber**

When the MS0908A Light Source Unit (visible LD) is installed, breaks in SM fibers up to 5 km long can be detected by eye.

- **Optical return loss measurement**

In combination with the MS0907A, optical return loss of SM fiber connector and optical parts can be measured easily.

Specifications

● MS9020D (mainframe)

Unit display	W, W (REL), dBm, dB (REL) selectable, 4 digits
Measurement resolution	W/W (REL) display: 0.1 to 1%, dBm/dB (REL) display: 0.01/0.1 dB, Blanking is possible.
Auto power off	Power turns off automatically after 5 minutes of no adjustment
Recorder output	1 V (on full-scale display), 0.316 V (on -5 dB from full-scale)
Battery alarm	Down-side part flickers when battery voltage goes down.
Auto offset	Sensor zero point is adjusted automatically.
Back light	Display section back light can be set on and off.
Averaging	On and off selectable
Range hold	Range can be specified and set to be on and off.
Reference value input	Used to input the loss point reference value
Buzzer	Sound when input level is higher than set reference level in 1 dB steps
Wavelength sensitivity characteristics compensation	Deviation of optical power sensor is compensated automatically in 5 nm steps.
Resume function	At power on, the state when the power is just turned off is restored.
Backup	Setting condition is backed up for 30 minutes, when the line voltage is zero at exchanging batteries for example.
Modulation	CW, 270 Hz, 1 kHz, 2 kHz (2 kHz is for MA9621A only)
Power	Operation is possible using AC adaptor, Ni-Cd battery [Operation hour: 4-hour for outputting light, No operation hour: 9-hour for light is turned off (when fully charged after new battery fully discharged), Charge time: 6-hour], UM-3 Alkali/Manganese battery*1 (Require 4 pcs. Operation hour is equivalent with Ni-Cd battery at 25°C.)
Temperature range	0° to +50°C (use), +10° to +45°C (at charging), -30° to +50°C (storage)
Dimensions and mass	90 (W) × 190 (H) × 38 (D) mm, ≤700 g
EMC	EN61326: 1997/A2: 2001 (Class A), EN61000-3-2: 2000 (Class A), EN61326: 1997/A2: 2001 (Annex A)
LVD	EN61010-1: 2001 (Pollution Degree 2)

*1: Optional accessories

- * 1: CW, 25°C
- * 2: Used with FC-type connectors
- * 3: When connected with Anritsu GI fiber (50/125 μm, NA 0.2, 2 m)
- * 4: When connected with Anritsu SM fiber (10/125 μm, NA 0.1, 2 m)
- * 5: CW, 0° to 50°C (5 hour)
- * 6: CW, at ±1°C (1 minute) within 0° to +50°C
- * 7: Specify one connector among those shown in the specification table.
When no connector and manufacturer's name are specified, FC-type will be mounted and supplied.
Other than the connectors indicated in the table are dealt in special connectors of custom-made. The ordering method of optical connectors are indicated in the table on page 8.
- * 8: Laser Product Safety Standards: (IEC 60825-1 Class-1, FDA 21CFR Class-1)
- * 9: Laser Product Safety Standards: (IEC 60825-1 Class-1M, FDA 21CFR Class-2)
- *10: Connected with SM fiber (ITU-T G.652), 2 m
- *11: CW, at 0° to 40°C ambient temperature, 5 hour
- *12: Use the conversion cord (see ordering information) for other optical connectors

Safety measures for laser products

MS0908A complies with the optical safety standards in Class 1M of the IEC 60825-1 and the FDA (21CFR 1040.10, USA) in Class 2; the following descriptive labels are affixed to the product (FDA label is only affixed to product for export to the USA).

The maximum output is indicated under *1, and the wavelength under *2.
