

AP Calibration Services

ISO/IEC 17025 calibration services

Accredited by A2LA

Audio Precision is accredited by A2LA under ISO/IEC: 17025 for equipment calibration at the Beaverton Factory in the USA.

Calibration has been requested by many of our customers who need to use calibrated audio test instruments to meet their own Quality System Requirements. Calibration provides documented verification that instruments meet or exceed all of their published specifications.

Calibration requires specific testing equipment and procedures to verify the performance of a device against published specifications. Accredited calibration adds a further degree of rigor to the testing process, incorporating review of Quality System Documentation as well as an On-Site Assessment.

If you are not located in the USA, please contact your local AP Sales Partners for local calibration services or to arrange shipment of your unit to the AP Factory.

Greater confidence in measurements

All supported new instruments sold by Audio Precision will come with a Calibration Report and Certificate demonstrating the unit meets or exceeds its published specification. Supported instruments already in the field can be sent to the Beaverton Factory for calibration.

Accredited by American Association for Laboratory Accreditation (A2LA) under ISO/IEC: 17025

Established in 1978 as a non-profit, public service, membership society, A2LA is dedicated to the formal recognition of competent testing and calibration laboratories, inspection bodies, proficiency testing providers and reference material producers. A2LA is a Full Member of the International Laboratory Accreditation Cooperation - ILAC, which serves as the world's principal international forum for the development of laboratory accreditation practices and the recognition of competent test facilities worldwide.

ISO/IEC 17025:2005 specifies the general requirements for the competence to carry out tests and/or calibrations.

The AP Calibration Services Advantage

- Accredited by A2LA under ISO/IEC: 17025**
 Documented Quality System for calibration; 17025 is the highest standard for calibration services.
- Full Service available**
 If the unit does not meet specification, we can repair or adjust it immediately. No extra time or cost shipping from the Cal lab to the Factory.
- Dedicated audio engineers**
 Automated systems and experienced AP technicians who know audio.

Accredited by A2LA under ISO/IEC: 17025
for equipment calibration

Calibration Availability
