The Barton® Ready Car Lift™ has been specifically designed for urgent-care facilities that routinely need to transfer physically-impaired or unconscious patients from a vehicle to a stretcher or wheelchair. Its unique features allow for fast response by attendants using a No-Lift Solution™ that is safe for both patient and caregiver.

An added dimension to the Barton® Ready Car Lift™ is its portability, which allows it to be used to lift dependent patients from any floor in the building with minimum risk of injury, making it the ideal lift for any urgent care facility.

LIFT SOLUTIONS

Ready Car Lift™

The Barton® Ready Car Lift™

Lifting and extracting from virtually any vehicle is accomplished by gentle movements of the patient as the electric actuator lifts and casters roll easily into position. This ensures a smooth, easy transfer that gives safety to both the patient and caregiver.

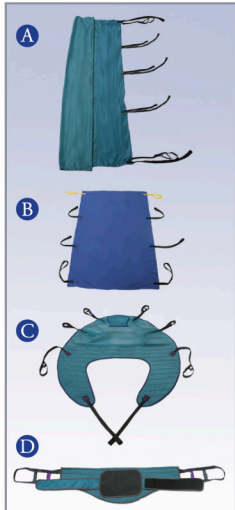

A variety of specially-designed Barton slings are available to use with the Ready Car Lift™. Our custom Car Sling keeps the patient stabilized for safe movement.

As an added benefit, the Ready Car Lift™ is also well-suited to lifting a collapsed or unconscious patient from the floor, making this equipment the ideal lift for any urgent-care department.

Years of reliable use are ensured with backing by Barton Medical's Lifetime Structural Warranty.

Standard Features

- 500-lb. capacity.
- Small, compact design for easy storage.
- Soft, padded hanger bar provides comfort as well as safety.
- Lifetime Structural Warranty gives your facility the security of long-term reliable use.
- IBS (Interchangeable Battery System) lets you conveniently and quickly keep the Ready Car Lift™ fully-charged and available.
- Safely stops during lowering if lift arm contacts the patient.

• A variety of slings can be used to transfer patients depending on their condition. Barton Medical can provide **A** Positioning Slings, **B** Single-Patient Use Slings, **C** General Purpose Slings (seen below), and **D** Waist Belts.

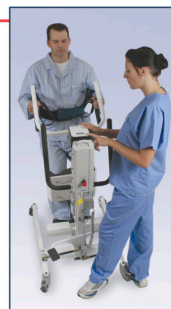

Barton® Ready Car Lift™

The Barton® Ready Car Lift™ allows for the safe and effective transfer of patients from vehicle. After applying the sling, simply (1) wheel the unit into the vehicle, (2) hook straps to the sling and electrically raise the patient, and then (3) lower them into a wheelchair or stretcher.

Barton's Lifting Solutions include

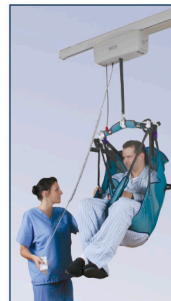

Barton® Sit-to-Stand Lift

- 500-lb. capacity.
- Padded, non-slip lifting belt lifts from the waist.
- Removable foot plate allows for gait training.
- Comfortable, molded leg cushion is adjustable.
