Handling patients safely includes many different types of tasks, from simply helping them stand to repositioning in a bed. The patients may be totally dependent or they may just require some assistance.

To meet the many and varied needs for lifting patients safely, Barton Medical Corporation has developed a complete line of mechanical lifting devices. Now the caregiver can perform a variety of lifting tasks with the aid of a powered lift, reducing their exposure to injury.

Portable Ceiling Track Lift

### Barton® Ceiling Track Lift

- Barton® Ceiling Track lifts are available in 475-lb., 650-lb. and 1000-lb. lifting capacities. Portable models are also available.
- Constructed with safety and reliability in mind, the unit features all metal gearing, usage counter, triple redundant safety system, self checking circuitry, thermal and weight cut-offs, full back-up controls, and emergency shut-off.
- Four-point carry bar enhances patient comfort and positioning ability.
- Innovative track design allows all types of configurations. Single track, room covering, wall mount, and free standing systems are just some of our options. High strength aluminum extrusion is coated to blend in with ceilings.
- Options include scales, return to charge, diffuse night lighting, and “cross-the-gap” privacy curtain trolley.

### Barton® Portable Ceiling Track Lift

Barton® Portable Ceiling Track Lifts allow a single unit to be operated in many rooms by a single person. Simply (1) wheel in the unit, (2) hook to the Ceiling Track System, and (3) electrically raise to the track for use. Capable of lifting 450 lbs.

### Barton® Ready Lift

- Available in 500-lb. and 700-lb. capacities
- Easy-open base uses ergonomically designed foot pedals to rapidly open and close the legs. Extra low base clearance allows access under most beds.
- 500-lb. model features extra compact design and two-point carry bar with center attach hook.
- 700-lb. model has extra long lift range and four-point carry bar ideal for larger patients.
- Car Lift model is specially designed for extracting patients from vehicles or other applications in the ER, such as lifting patients from chairs.

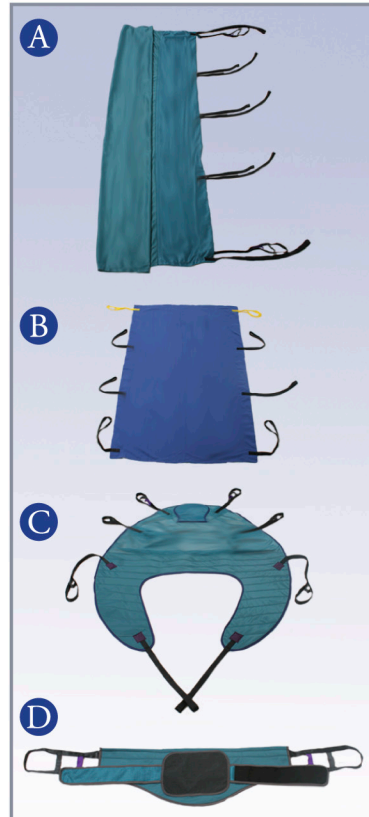

### Barton® Ready Stand

- 500-lb. capacity allows for the safe, comfortable lift of the largest of patients.
- Padded, non-slip lifting belt lifts from the waist, not under the arms.
- Removable foot plate allows for use as a gait training device.
- Comfortable, molded leg cushion is adjustable for different patients
- Available with scale attachment (right).

### Barton® Slings

Barton® Medical has designed a variety of slings that combine comfort, economy, and patient safety to assure continued successful use of our lifts. Except for the sit-to-stand waist belt, all slings can be used on either ceiling track or floor lifts.

- A Positioning slings** used for lateral transfers, log rolling, or boosting a patient in bed.
- B Single patient use positioning sling**
- C General purpose sling**, padded with head support. This incredibly versatile sling can be used for chair transfers, toileting, or picking up a patient that has fallen. Available in reusable or single patient use.
- D Waist Belt** for use with sit to stand lifts
