

Dolphin LX 0030 A - LX 0430 A

LX 0260 A

Description

Our Dolphin LX range of liquid ring vacuum pumps are designed and built with both user and OEM in mind.

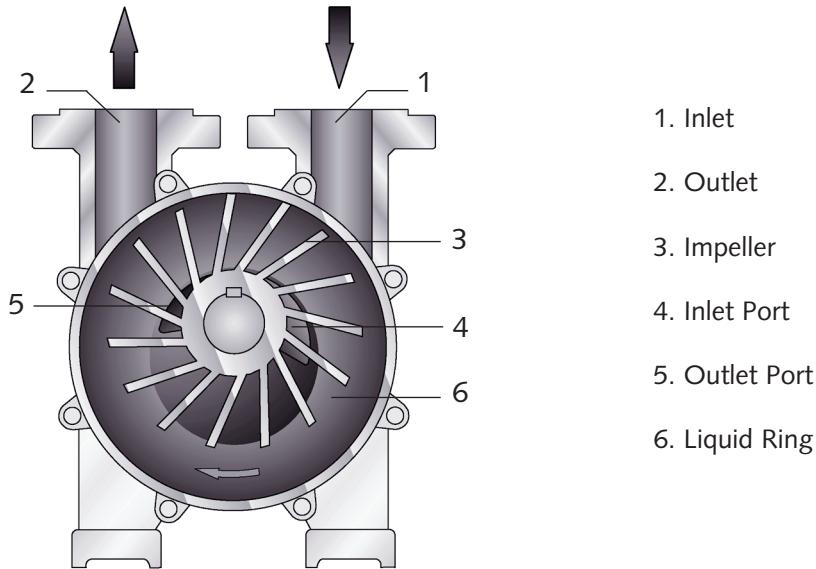

The Dolphin is well suited for wet and corrosive applications. It combines the benefits of high efficiency from a compact rugged machine, and reduced running cost from a competitive product.

Features

- Ultimate pressure of 25 torr (29" Hg Vac)
- Access cover for easy internal inspection
- Compact, single stage design
- High efficiency
- Low service liquid requirements
- Well suited for wet applications
- Cast iron housing, with bronze impeller
- Variable discharge port
- Mechanical shaft seals
- Rugged construction
- Only one moving part
- Low maintenance
- Low vibration
- Minimum noise levels
- Minimum heat emission
- Optional materials available upon request

Liquid Ring Vacuum Pump

Operating Principle

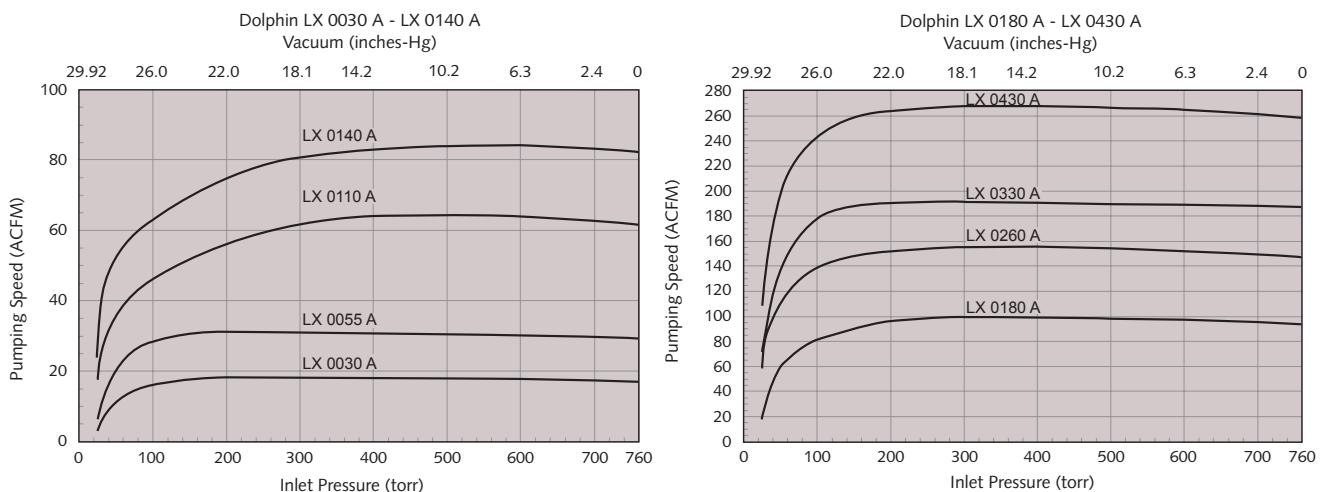

Operating Principle

Liquid ring pumps operate with only one moving part, the impeller shaft assembly. The impeller is mounted eccentrically relative to its casing. The liquid ring is formed by the service liquid (normally water) rotating concentrically in its casing. Process gas enters through the suction port, travels between the impeller blades and is compressed prior to exhausting through the discharge port along with a quantity of service liquid.

Areas of Application

- Autoclaves
- Automotive
- Chemicals
- De-aerating
- Distillation
- Dryers
- Food
- Filtration
- Hospitals
- Impregnation
- Packaging
- Milking Machines
- Molding
- Plastics
- Pharmaceuticals
- Paints
- Paper
- Solvent Recovery
- Soaps
- Tobacco
- Timber Treatment
- Textiles

Pumping Speed vs. Inlet Pressure

All data based on dry air @ 68°F, and water as sealing fluid with 59°F ring temperature.
