

Not all Vacuum Pumps are Equal

Check the Differences

Ask Yourself these Questions

Do I change filters and oil often?

The Busch Mink Pump

No oil filters and chamber oil to change. Gearbox requires only annual changes.

Does my pump clog with sawdust?

Its dry, non-contacting design is very tolerant to dust particles.

Does the vacuum fluctuate?

Provides consistent vacuum for better holddown.

Is my pump a vane-type design that experiences premature vane wear?

Its rotary-claw design (no vanes) eliminates wear problems.

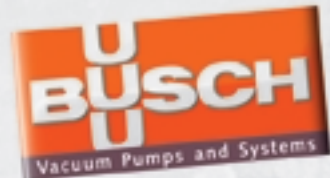

Is energy savings important to me?

Non-contacting rotors reduce overall horsepower.

Am I spending time and money on maintenance and repair parts?

Non-contacting design yields lower life cycle costs.

Busch Mink vacuum pumps are especially suited for the demands of CNC routing machines – they are reliable, efficient, and easy to maintain. For more information on the Mink and all your pump choices, visit our website.
