

Pressure and Vacuum Pumps for the Printing Industry

Merlin Combination Pressure/Vacuum Pump

Mink MM

Mink Pressure or Vacuum

R5 Rotary Vane Vacuum

Seco Model SV1063

Seco Model SV1040

Seco Print for Vacuum and Pressure

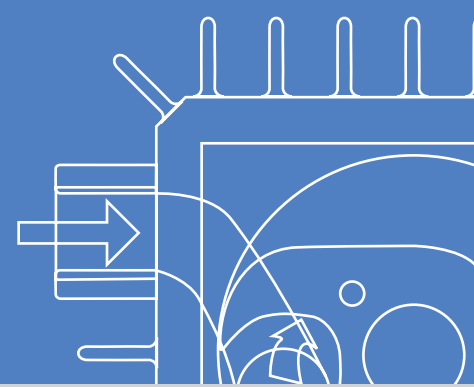

Seco Model SV1004

Samos Regenerative Blower

Samos 2-Stage Regenerative Blower

Merlin Models

The Merlin is a rotary, non-contacting, claw-type combination pump that provides both pressure and vacuum with independent, completely oil free, pumping chambers. The Merlin's extreme tolerance of paper dust is welcomed by professional printers along with its low cost of ownership.

Mink Models

Feature a rotary, non-contacting, claw type dry design for pressure or vacuum

R5 Models

Feature a rotary vane, oil-recirculating design that is direct driven, air-cooled, compact and quiet

Seco Models

Feature self-lubricating, dry, carbon composite rotary vanes and sealed-for-life bearings

Samos Models

Dry running, regenerative side channel type blowers that produce low to moderate pressure or vacuum

Printing Applications

- Binders
- Cartoners
- Casemakers
- Coaters
- Copy Cameras
- Die Cutters
- Feeders
- Folders
- Heat Sealers
- Hot Foil Stampers
- Inserters
- Joggers
- Printing Presses
- Paper Cutters
- Perforators
- Platemakers
- Saddle Stitchers
- Scorers
- Stackers
- Shrink Wrappers
- Slik Screening
- Stitchers
- Tipplers
