

# Busch Maintenance Reminder

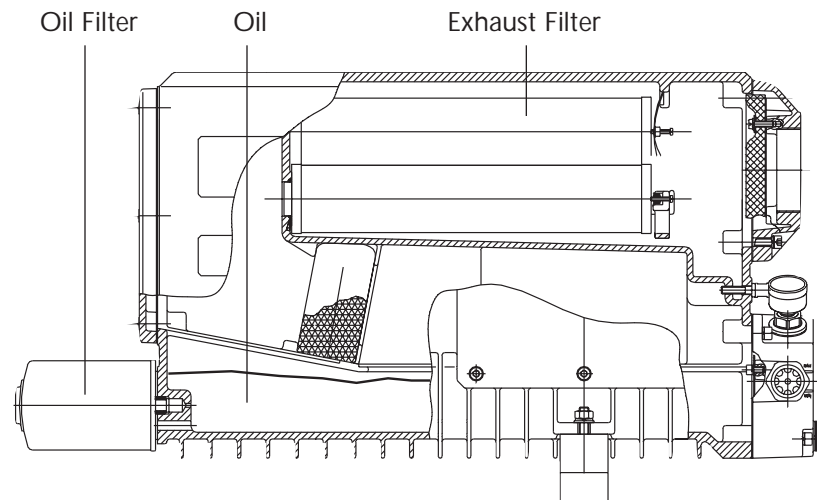

## Oil and Oil Filter Change

Typical clean air oil change interval is 500-750 hours or as necessary.

## Exhaust Filter(s) Change

Change every 9-12 months or as necessary. Change is required when filters become clogged with oil or contaminants, or the exhaust pressure gauge is about to or has entered the red zone.

Additional maintenance items include the air filter which should be changed as needed; the exhaust valve replaced every 2 years; and the motor bearing should be greased every 6 to 12 months.

Time to Order a Busch Maintenance Kit After Your Last Oil Change

Running Hours	500	1000	1500	2000	2500	3000	3500	4000	4500	5000	5500	6000	6500	7000	7500	8000
Maintenance Items	Maintenance Hours															
Oil	500 hrs															
Oil Filter	500 hrs															
Exhaust Filters	9-12 months															

Maintenance Kit: P/N 0993.909.185 - Pump Model 025 for 1 shift.

## Exhaust Filters

Designed for proper oil and air separation with minimal back pressure. End caps resist corrosion. Filter materials are manufactured for long service life.

## Oil Filters

Filter out impurities in the oil. Designed for low pressure filtration for proper oil flow.

## Pump Oil

R-530 pump oil is detergent free oil, derived from highly refined paraffinic crudes with excellent lubrication properties for longer pump life.
