

MODEL: iR2200/ 2800 / 3300

SUBJECT: Differences between C1 & C2 Network
Printer Boards Kits.

Detail:

The iR2200, 2800 and 3300 have all been launched with the option of fitting a Network Printer Board Kit- C1 or C2.

The differences between them are:

Printer Kit-C1	-	Postscript + PCL
Printer Kit-C2	-	PCL ONLY

Consequently each kit requires a different BOOT ROM. The iR2200 system software disks lists 3 directories - **COPIER**, **'H'** and **'N'**.

iR2200	for stand alone Copier use only
iR2200 'H'	for PCL ONLY (only BOOT ROM information) for system firmware, use the system from the 'N' directory
iR2200 'N'	for PCL and Postscript.

The BOOT ROM's are physically different and should **not** be interchanged.
