02-OIPQA4-C0017 / FY9-4138-000	1.64	1.64 (en/ja)	8.27	1.61 (en/ja)	Acquiring production approval for the 120V PS/PCL model.

Details: The changes, including version changes, made in each model of the iR2200i up to the release of v5.04, are as follows:

1. Changes Made When Upgrading Language v5.04

No.	Item	Description
1	Support of 14 European Languages	Support of 14 European Languages

2. Changes Made When Upgrading RUI v5.03

No.	Item	Description
1	The release of the Spanish version.	In addition to Japanese, English, French, Italian and German, [finishing / a release / already], Spanish is released.

3.Points to Note When Upgrading of System

Item Initialized

The system is upgraded by overwriting. All settings (for user mode, service mode) will remain intact, and no item will be initialized.

The version of the Service Support Tool used for the upgrading is v1.32 or later(The newest version:v1.51)

Limitations:

1. Forgone Specifications

The following exist as forgone specifications:

No.	Items	Description
A-1	Centronics Interface and Bi-Directional Data Communication	<p>When an appreciable number of jobs are sent by a client PC to the iR2200i, loss of jobs occurs under the following conditions: the client PC is running Windows NT4.0, the port of the Centronics interface is set to "bi-directional," and the iR2200i is in sleep mode or paper runs out. (All jobs after the error will be lost.)</p> <p>[Prevention];</p> <p>Set the port of the Centronics interface to "not bi-directional" when setting the properties of the printer driver.</p> <p>[Measures];</p> <p>An instructions sheet will be included with the User's Manual.</p>
A-2	JBIG Viewer for Mac	Files stored in JBIG format to a client using JBIG Viewer cannot be printed from a Mac machine.
A-3	#899 (end in transmission job history)	<p>The history of transmission jobs indicates '#899' (e-mail, i-FAX, Canon FTP transmission). The code can mistakenly be interpreted as failure of transmission, although it actually means that "e-mail or i-FAX transmission has ended. However, the use of multiple servers makes it not possible to ensure that the recipient has received it."</p> <p>Measure</p> <p>The manual contains a description to this effect, and it has been decided that it will be left as it is so that the user will realize the importance of ensuring that the recipient actually has received mail/fax.</p>

2. Running Change

There is no item designated for running change.

Version Configuration

The operating guarantee of the iR2200i System v5.04 is undertaken for the following combinations:

iR2200i(System v5.04) Software version

System	Language	Boot ROM	RUI	R -CON	DC -CON	DADF -H1	Fin-J1	Fin -G1	PUNCH	FAX
5.04	5.04	9.28 <i>8.27</i>	5.03	7.01	10.01 <i>9.02</i>	6.01	1.05	5.01 <i>4.06</i>	5.01 <i>3.02</i>	31.02(for USA) 18.08(for Europe /Other regions)

Note: The above-mentioned underline portion shows the version which corresponded this time.

No change has been made to other firmware, and each combination of versions is guaranteed for operation.

The notations in italics in the table indicate versions for which upward compatibility has been verified.
