# Power Supply-B1
Installation Procedure

Install the Power Supply-B1 as instructed in this booklet.

1. Unpacking

Unpack the shipping box, and check its contents:

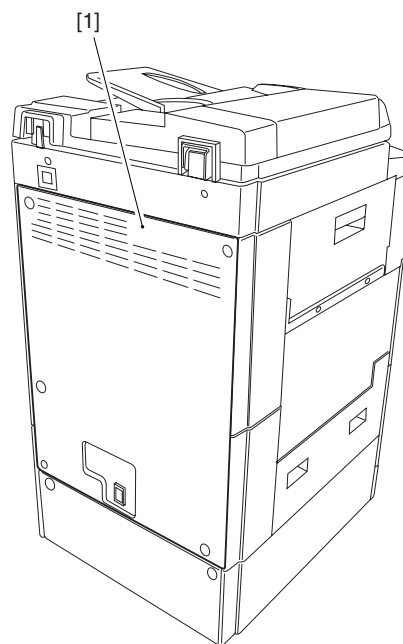

F1-1

[1] Power supply .... 1 unit
[2] Screw (M4x6) .... 2 pc.
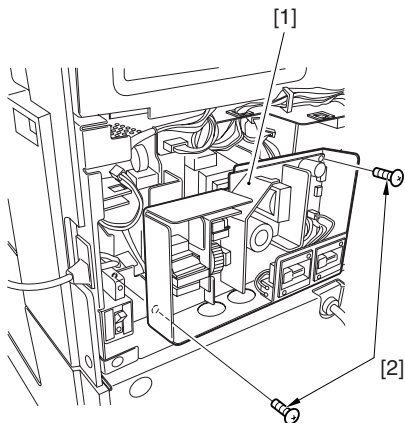

2. Installation

1)   Remove the rear cover [1] of the host machine.

F2-1

2) Place the power supply [1] along the bend of the plate, and secure it in place with two screws [2].

F2-2

3) Connect the connector [1] of the cord from the power supply to the connector of the host machine.
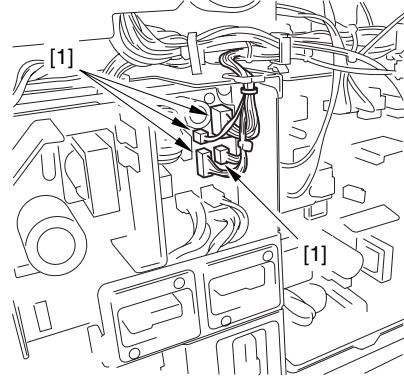

F2-3

4) Open the cord clamp [1] on the harness on the right top of the power supply, and lead the harness that connects to four connectors.
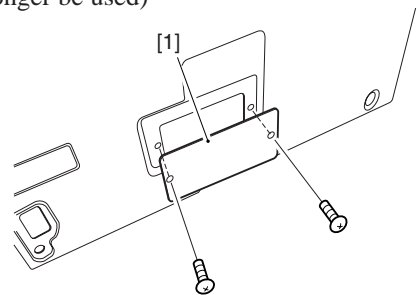

F2-4

5) Connect the four connectors [1] to the right top of the power supply.
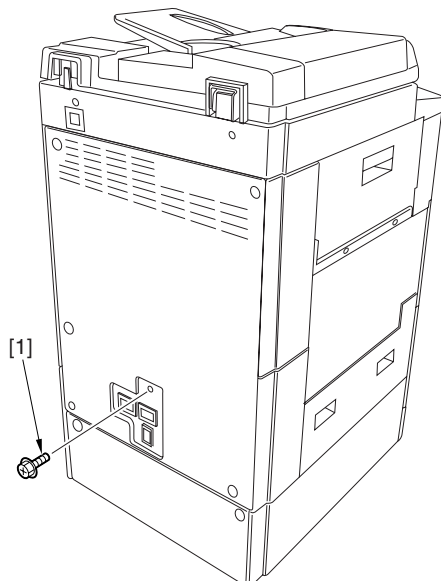

F2-5

6) Remove the face plate [1] found at the bottom of the rear cover of the host machine. (2 screws; one of the screws and the face plate will no longer be used)

F2-6

7) Mount the rear cover of the host machine. Use one of the screws [1] removed in the previous step into the hole above the power supply connector.

F2-7
