

MODEL: iR2200 Series / iR5000-6000 / iR8500.

SUBJECT: PostScript Drivers Version 1.11

Details:

The iR series PS3 Driver Ver 1.11, which is used with the iR8500 / iR2200 series and the iR5000-6000, has a slight bug in that when it is installed under Win98 - original version, the installation stops and requests the following file; " **CnS3e.cat**". The missing file is actually the Win2000 / Win Me, WHQL Catalog file, which is not necessary for Win 9x operation. Therefore this file can be '**SKIPPED**' when installing the driver on Win98 and will in no way effect the operation of the driver.

The problem does not occur with Win 98 - Second Edition. This problem will be fixed on the next version of the PS3 driver.
