Remarks

1.Specification below are deferred:

T-3

Specification Deferred

No.		
1	During copying/printing or standby,alignment behavior occurs	This is required to keep the quality of images.
2	Scan data cannot be sent after saved in BOX.	Scan data cannont be sent as color devices treat them as scan document.
3	SST's effect is not remarkable.	It cannot be more effective due to the potentiality because of being 600dpi.

2.Supported version of User Software are as below:

T-4

User Software

User Software	Version

Servise Parts: The service parts are not set.

Future Release   There is no schedule of release of System CD-ROM

Special Note

1. There is no fear of infection about the computer virus that exploites the vulnerability of Windows been disclosed by the Microsoft company because Color imageRUNNER Series uses OS different from Windows.

2.SEND feature has function to acquire the device information(Address Book) using the encryption module(LDAP).This encryption module has an export restriction,and is forbidden to export countries below:

Iran,Iraq,NorthKorea,Cuba,Sudan,Syria and Libya

*LDAP(Light weight Directory Access Protocol) operates the search and update from the client to the server.It enhances the security of the communication using the encryption process,SSL(Secure Socket Layer).SSL is a method to encryption the network path.
