**Subject:**

Procedure for removing FIX FEED DRIVER PCB ASSEMBLY

**Detail:**

The procedure for removing the FIX FEED DRIVER PCB ASSEMBLY (FM2-0822) in the Service Manual has been changed.

Major changes:

1. So that 3 connectors on the undersurface of the FIX FEED DRIVER PCB ASSEMBLY will be easily detached, remove the mounting screw of the FIX FEED DRIVER PCB ASSEMBLY mount, and then detach the 3 connectors while lifting the mount.
2. Use long-nose pliers to remove the connector that is hard to be detached.
