Productive, affordable colour communication for your office

Cost-effective colour for everyday use

Colour when you need it

Colour with control

Canon makes colour affordable for all businesses. The iRC4080i and iRC4580i multifunctional printers employ new levels of intelligence to enhance document communication throughout your office. Control how colour is used, where it's used and how much it costs you.

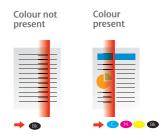

Affordable colour

Not so long ago incorporating colour in your business meant escalating costs. Canon's Office Colour Range provides the affordable solution. The iRC4080i/iRC4580i is an intelligent, cost-effective multifunctional device, that brings the power of colour communication to your business, for only slightly more than you would expect to pay for black and white printing. And it gives you unrivalled levels of management control, allowing you to oversee colour usage throughout your business.

Controllable colour

There are many ways that Canon's iRC4080i/iRC4580i help you control colour. Auto-Colour Sensing means that the device detects whether or not a page, or pages within a document, contain colour, and then prints them accordingly. So when colour isn't required, you don't pay for it – just as if you were using a black and white device! It's also possible to set the printer driver to default to black and white, providing colour only when specified by the user.

Auto-Colour Sensing helps reduce costs

Additional management control

Incorporating Canon's optional iWAM MEAP software takes your printing knowledge to a different level.

iWAM MEAP provides an ongoing and detailed insight into who is printing what, where,

and how much it's costing you.

Further control comes courtesy of an inbuilt Department ID mode which allows you to specify limits on colour usage by both user and department, helping to ensure colour is used efficiently and effectively when it's needed.

Security conscious

Canon ensures your business information is safe and secure.
Access to the iRC4080i/iRC4580i can be controlled via passwords, your company's network log-in procedure, or even fingerprints! Documents can

be held in secure mailboxes, until the relevant user is ready to print. Scanned

documents can also be encrypted before sending to others. For highly sensitive material, a secure watermark can be embedded into a printed document, becoming prominent when someone attempts to make a copy. Network authentification tools ensure that only authorised PC's or Macs can communicate with the iRC4080i/iRC4580i. Furthermore, device hard disks can be erased or encrypted, and "job logs" concealed.

Confidential documents sent to print.

Effortless IT management

The Canon iRC4080i/iRC4580i come "network-ready", so installing on your network is a simple task.

iW Management Console (iWMC) is a web-based utility that facilitates centralised management of networked devices – ideal for busy IT departments. This standard feature enables remote management of device settings, discovery of new devices using automated tasks, and device error notifications via email.

Emails can indicate low toner, and device maintenance problems so they can be dealt with easily and quickly, ensuring minimal downtime. iWMC also allows administrators to replicate settings and address books across multiple devices.

Canon's unique e-Maintenance system automatically reports any problems, so there's no need to worry about constant monitoring.

Everything in colour from one powerful performer

The iRC4080i/iRC4580i frees up valuable space in your office. Instead of numerous space-consuming devices, empower your staff to print, copy, fax, scan and send information in colour intelligently from one compact, productive device. And with web-access staff are able to browse the internet and then print directly from the device.

Print Scan Copy FTP server Database Send iFAX e-mail Mailbox

Performance printing

The iRC4080i/iRC4580i resides on your network to provide easy shared access amongst groups of users.

Optimised for extensive colour document creation, the iRC4080i

prints and copies in colour at a swift 36 pages per minute (ppm) and the

iRC4580i an even faster 40 ppm. Printing supports industry-standard PS/PCL, and Canon's unique UFRII, enabling enhanced network processing speeds.

Printing is carried out from the comfort of users' desktops via a simple-to-use interface. And a large colour touch-screen makes operation at the device equally simple.

Hole Punched

Saddle Stitched Booklet

A3 Landscape Hole Punched

Professional printing

The iRC4080i/iRC4580i gives you the confidence to create the most professional-looking documents with little effort. It's easy to produce stapled or hole-punched reports, eye-catching booklets and impactful customer proposals in colour, and on a variety of different media types.

Canon's iWPM software enhances productivity further. Normally, when you want to create a report combining information from different files such as Word or Excel, you need to print them first and then manually collate. This takes time. iWPM lets you carry out the collation effortlessly and electronically at your desktop, prior to printing a completed version.

Furthermore, Job Block Combination allows different types of documents, from A5 -SRA3 to be scanned/copied, and then combined using the touch-screen prompts. This electronic file can be easily manipulated and printed as a complete document.

Quality printing

Using Canon's Spherical Toner, print quality is superb at 1200 dpi and prints

look crisp and sharp from the first to the last. A matt finish means you can make notes directly

on colour prints – ideal for PowerPoint handouts and when reviewing reports.

Powerful communication

The iRC4080i/iRC4580i allows you to communicate in ways not previously possible, and far more efficiently. Documents are scanned at 70 images per minute (ipm) via the sturdy document feeder and can be instantly 'dispatched' as PDFs to a huge variety of locations - such as network folders, email addresses and mailboxes. If you wish to integrate with database applications use software such as Canons iWDM or eCopy.

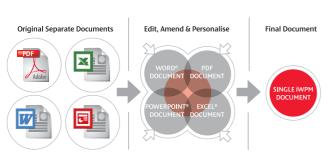

Don't equate scanning with decreased legibility. Trace and Smooth technology can actually improve the clarity of scanned documents. Network speeds aren't compromised either, as PDF's are automatically compressed prior to being sent.

Mailhox

Mailboxes for added versatility

The iRC4080i/iRC4580i has built-in mailboxes to aid versatility and confidentiality. Mailboxes act as secure storage at the device for all documents, and can be established for individuals and groups of users. Any document can be scanned, sent to, or printed directly from a mailbox at your convenience – handy if you don't want a confidential report lying around before you have a chance to retrieve it - and you can also preview documents in your mailbox at the device before printing.

iW Publishing Manager

Communicate quickly and effectively

Imagine the impact

Produce the results you never imagined

Take your business in a new direction with the iRC4080i/iRC4580i. Think of all the work you currently send to the local print shop. Now you can do it quickly and more cost-effectively in the office.

1 Professional finishing

For heavier workloads the Finisher W1 provides three trays and a 4,000 sheet capacity. It also accommodates 50 sheet stapling for sturdier report production.

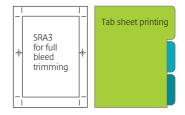

To create the most professional-looking documents with no more than a few simple mouse clicks, from the comfort

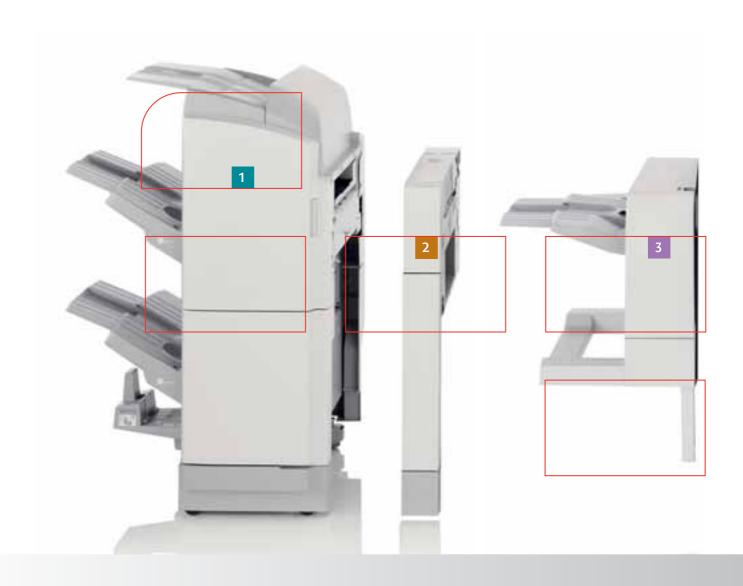

Professional Output of your desktop turn to the Saddle finisher W2. With it you can produce automatically folded

booklets. It's even possible to create booklets up to an impressive A4 in size. Add Canon's iWPM, and you can combine information from different files to create a staff magazine, or even your own company brochure!

3 Finished documents

Print or copy colour reports and then corner-staple them for a superb finish. Staple capacity is 50 sheets of A4 or 30 sheets of A3, with a capacity of 500 A3 sheets or 1,000 A4 - A5R in a single print run.

4 Document feeder/image reader

A 100 sheet document feeder helps cope with scanning and sizeable copy runs, accommodating documents with different sized pages.

The image reader combined with Universal Send enables you to scan documents which can be sent instantly to email addresses, mailboxes and network folders.

6 Advanced technology

The iRC4080i/iRC4580i aids efficiency. Print documents using both sides of paper and you can reduce paper consumption and costs too. A sleep mode helps cuts down on power consumption when not in use. The device also adheres to the strictest environmental standards such as RoHS, which restricts the use of hazardous substances.

Using MEAP (Multifunctional Embedded Application Platform), Canon's Java based application platform, enables new and customised software to be incorporated directly within your device. This way you can future proof your investment.

7 8 9 Be demanding

A total of 5,000 sheets gives huge versatility from 6 different sources, allowing you to produce stunning colour documents combining different media types and weights. Configure the iRC4080i/iRC4580i with the 2,700 sheet Paperdeck and you have a comprehensive paper supply equipped for the most demanding workloads. Each of the 550 sheet cassettes are user-adjustable to cope with paper sizes between A5 - SRA3. Imagine SRA3 producing A5 colour leaflets for mailing or handing out to customers, or SRA3 posters to display in the office. The 100 sheet manual bypass accommodates a variety of media up to 253gsm. You can also use it to print directly onto tab-sheets, which act as section dividers for important business reports.
